Cookware
Electric Oven

It can be difficult to cook everything you need at the same time, but with Samsung’s Twin Convection™ technology you get twice the choice. Upper and lower cooking zones can be used independently or together, so you can cook two completely different dishes at once.
Key Features - Electric Oven

**Twin Convection™**
Separately controlled temperature and time functions allow upper and lower zones to be used simultaneously to prepare two different dishes.

**Professional Cooking Mode**

**Pro-Roasting Mode**
Sears and seals in juices at 220°C, then continues cooking at a pre-selected lower temperature to keep roasted meat tender and juicy.

**Intensive cook**
Cook deep dishes and frozen meals thoroughly by delivering even, highly concentrated heat.

**Fast Preheating**
Save time with the fast preheating function, which allows the oven to heat up quickly.

**Speed Cooking**
Speed Cooking mode allows you to combine microwave heat with other heat sources* to cook food faster.

**Spacious Interior**
This oven offers up to 70L of space once its dividers are removed.

**Rotisserie**
Enjoy barbecue style cooking with the split/multi spit.

**Telescopic Rack**
The tray rails are sturdy and can slide out easily and safely.

**Keep Warm**
Manage the balancing act of preparing and serving multiple dishes at once with the Keep Warm function to keep prepared food warm until serving time.

**Dual Fan**
Two fans in the oven instead of one that work together to spread heat evenly.

**Twin LED Display**
The dual digital display features two rows of LEDs that clearly display oven settings.

**Plate Warming**
The Samsung NEO Twin Oven offers Plate Warm functionality. By heating plates, food will stay warm longer and taste better at the table.

**Auto Menu**
Take the guess work out of cooking times and temperatures. Simply select a setting from the pre-selected menu to get your meal underway.

**Child Lock**
The special safety lock keeps little hands away from danger.

**Fast Preheating**

**Rotisserie**

**Telescopic Rack**

**Auto Menu**

**Child Lock**

*Such as grill, convection or roast.*
Key Features - Electric Oven

**Cool Door**
Quadruple or triple glazed glass doors keep heat in the oven and the door remains safe to touch.

**Pyrolytic Clean**
Superheats the oven to burn off any cooking deposits so you don’t need to use harsh chemicals to clean.

**Steam Clean**
Set the steam clean feature and after 25 mins simply open the door and wipe clean.

**Catalytic Clean**
A specially designed lining means the oven cleans itself, so you can put away those oven gloves!

**Dual Steam**
Enjoy healthy steamed food with the Samsung Compact Steam Oven. This unique Dual Steam system injects a cloud of steam into the oven cavity to surround and cook food evenly.

Induction Hob & Ceramic Hob

The perfect addition to any kitchen, providing a spacious, stylish design and multipurpose cooking zones.
Key Features - Induction & Ceramic Hob

**Any Dish Zone**
Any Dish Zone automatically adapts to the size of the pots you use so you can cook with many dish shapes and have even heat distribution.

**Slide Touch Control**
Allows you to adjust heat quickly and precisely by simply sliding your finger across to select power levels.

**Keep Warm Function**
Keeps food warm, ideal for keeping chocolate melted without burning.

**Safe Operation**
Neutral surface generates heat only upon contact with stainless steel or other induction compatible cookware, so the surface you’re not cooking on remains cool.

**Overflow Detection**
If a pot overflows, the overflowed food won’t heat and cook to the surface, allowing easy cleaning.

**Automatic Safety Lock**
Enjoy peace of mind with an automatic safety shut-off function that ensures the hob is off when you want it to be.

**Residual Heat Indicators**
The residual heat indicator displays an H when the cooking surface is hot, and turns off when it’s safe to touch.

**Ceramic Surface**
A sleek and sophisticated design to enhance the look of your kitchen.

**Easy to Clean**
Simply wipe the surface clean with a soft cloth for great results. Induction cooktops only heat stainless steel dishes so food splatter does not get cooked on.

**Smart Touch Control**
Featuring easy control functions at the touch of a finger.

**Dual Zone**
Cooking zones can be modified to accommodate the size of your cookware.

**Multi-Purpose Zone**
An oblong-shaped cooking zone that can be extended to allow you to cook with larger dishes.
80cm Induction Hob
Flexibility, speed and control.

Induction Hob
Sleek styling combined with speed and control.

Additional Features
- 1-15 Power level with Booster

Microwave

Not only looks stylish, but offers innovative technology to ensure fantastic meals.
Key Features - Microwave

**Ceramic Inside**
The ceramic enamel interior allows most grease and oil to be easily wiped off the inside walls, and does not absorb moisture, odour or flavour.

**Anti-Bacterial Protection**
The ceramic enamel material provides a coating which helps prevent the build up of bacteria.

**High Scratch Resistance**
The ceramic enamel interior of the microwave is designed to have high scratch resistance.

**Triple Distribution System**
Three microwave distribution points provide consistently even, thorough cooking.

**Slim Fry**
By combining a grill with warm air circulation, food is cooked crisp inside and out without the excessive oil used in a deep fryer.

**Dough Proof/Yoghurt**
Enjoy fresh dough or healthy yoghurt any time of the day with the fermentation function which utilises advanced fermentation technology.

**Smart Multi Sensor**
Cook food with precision with the Smart Multi Sensor which determines whether cooking stages are completed, eliminating over or under cooked meals.
