- For precise simulations, print the marker scaled to fit A4-sized paper 100%.
- AR marker should be neither bent nor crumpled. Capture the marker in a bright room to increase recognition rates.
- After TV is created on the screen, watch it from 2 meters away.
For precise simulations, print the marker scaled to fit A4-sized paper 100%.

AR marker should be neither bent nor crumpled. Capture the marker in a bright room to increase recognition rates.

After TV is created on the screen, watch it from 2 meters away.
