

## Samsung Solution: SafeCom

A personal printing solution that increases security, ensures printouts are not forgotten in the output tray and reduces waste and print costs.

**SAMSUNG**

# Secure, cost-efficient and personal printing on networked printers or MFP

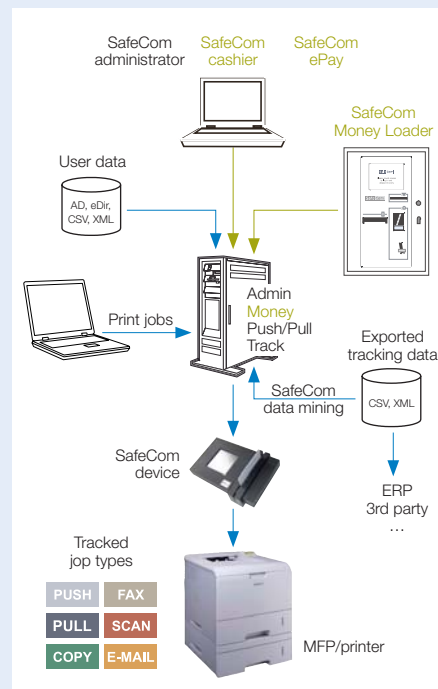

## Solution Overview

When evaluating their printing infrastructure, many companies and organizations find that it is both expensive, inefficient and, in the worst case, breaches security. SafeCom helps you achieve the convenience, efficiency and security needed, while driving down print costs. The patented SafeCom Pull Print enables the user to print a document at any available printer.

Proximity cards for authentication and job release

Keypad or magnetic swipe cards for authentication and job release

## Benefits

- Robust, scalable and modular solution for companies of all sizes, up to large multi-server solutions across many geographical locations
- Control and reduce printing costs and paper and toner waste
- Collect prints at any printer with SafeCom Pull Print
- Replace multiple personal printers with fewer, large, cost-efficient printers/MFP's
- Centralize and simplify administration of printers and print queues
- Apply usage statistics to plan and simplify logistics with fewer and more homogeneous printers to improve your return on technology investment

## Printer Compatibility

- Works for networked Samsung printers and MFPs

## Features

### SafeCom Hardware

- Works with all printers and MFPs
- User authentication at the printer with a wide range of reader types
- Copy control for many MFPs

### SafeCom Software

- Pull printing to turn networked printers into personal printers
- Pay or campus print management (for educational institutions) ensures users pay for print in advance
- Track data for print, copy, fax, scan and scan-to-email jobs
- Administrator API gives an overview of all print activity
- Users can manage their account on the internet, including ePay to charge accounts over the internet
- Recover billable expenses from any tracked jobs

## Usage Areas

- Corporate customers with many locations and roaming users
- Educational institutions or libraries in need of quota or fee based printing and copying
- Hi-tech and competitive industries where security and confidentiality is important
- Government, hospitals and public sector where the patient or clients discretion is important
- Companies with customers that pay all billable expenses on a given project, for example engineering consultants, advertising agencies, or law firms
- Outsourced printer fleet management solutions
- Any company or organization that wants document security, decreased print costs, and increased business and user efficiency
