

Samsung WEEE Recycling Amounts by region

Table 1 - Annual recycling volumes in Korea/Japan (tonnes)

Product	2008	2009	2010	2011
Large Household Appliances	9,340	11,087	12,480	11,356
Cold	25,957	26,037	30,170	26,875
CRT & Display screens	11,476	10,990	16,033	13,577
Small Appliances	3,354	2,300	2,240	2,425

Table 1 includes combined Korean and Japanese data for collected and recycled volumes. Korean data, which is based on mixed brand returns, is provided by Samsung's own Recycling Center, ASAN, and through other recycling partners. Japanese data, which is based on own brand returns, is generated through the "A" group waste stream, of which Samsung is a member.

Table 2 - Annual recycling volumes in Europe (tonnes)

Product	2008	2009	2010	2011
Large Household Appliances	10,937	17,213	18,810	14,988
Cold	38,091	31,972	31,055	34,191
CRT & Display screens	107,047	112,814	142,773	171,957
Small Appliances	13,892	25,355	27,310	24,701

Data shown in Table 2 is from the European countries in which SAMSUNG Electronics is a member of a recycling compliance scheme, and shows the weight of WEEE collected and recycled. As WEEE in the EU is currently financed collectively, the volumes shown are the weight of mixed-brand WEEE recycled by our contracted compliance schemes on our behalf.

Table 3 - Annual recycling volumes in North America (tonnes)

Product	2008	2009	2010	2011
CRT & Display screens	1,400	7,024	23,288	35,516

Data shown in Table 3 is provided by Samsung recycling partners operating in North America, and is comprised of mixed brand returns.
