HYGIENE
OPTION

60 MIN
EXPRESS WASH

Wide LED Display

Enjoy a simpler and more intuitive way to clean your dishes with a large and wide LED display that is easy to read. You can quickly check the status, settings, remaining time and cycle progress at a glance, even from a distance. So you can effortlessly monitor and control the washing performance.

Hygiene Option

A Hygiene option can be activated with certain programs to get everything hygienically clean. It extends the final rinse and increases the water temperature to 70 °C, which enables deeper cleaning and kills off bacteria and germs. So your dishes, cutlery and cooking utensils are always safe to use.

Half Load

Gone are the days of waiting for the dishwasher to be full. The Half Load setting gives you much greater flexibility as it allows you to fill and clean items in the bottom zone only. So you can save time and energy by running smaller loads and enjoy the convenience of having clean dishes at any time.

60 Min Express Wash

A 60 minute Express Wash option gets your dishes clean and dry much faster. It's ideal for smaller loads of lightly soiled items that don't need really intensive cleaning, such as cups, cutlery and dinner plates, as it will put them through a complete washing and drying cycle within just 60 min.
