Cleaning

Exercise care when cleaning as the panel and exterior of advanced LCDs are easily scratched.

Take the following steps when cleaning.

1. Power off the product and computer.
2. Disconnect the power cord from the product.
   Hold the power cable by the plug and do not touch the cable with wet hands. Otherwise, an electric shock may result.
3. Wipe the product with a clean, soft and dry cloth.
   - Do not use detergents that contain alcohol, solvent or surface-active agents.
   - Do not spray water or detergent directly on the product.
4. Wet a soft and dry cloth in water and wring thoroughly to clean the exterior of the product.
5. Connect the power cord to the product when cleaning is finished.
6. Power on the product and computer.

Storage

High-glossy models can develop white stains on the surface if an ultrasonic wave humidifier is used nearby.

Contact Customer Service Center if the inside of the product needs cleaning (service fee will be charged).
Before Using the Product

Safety Precautions

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>RISK OF ELECTRIC SHOCK DO NOT OPEN</td>

Electricity and Safety

The following images are for reference only. Real-life situations may differ from what is shown in the images.

⚠️ Warning

- Do not use a damaged power cord or plug, or a loose power socket.
  - An electric shock or fire may result.

- Do not use multiple products with a single power socket.
  - Overheated power sockets may cause a fire.

- Do not touch the power plug with wet hands. Otherwise, an electric shock may result.

- Insert the power plug all the way in so it is not loose.
  - An unsecure connection may cause a fire.

- Connect the power plug to a grounded power socket (type 1 insulated devices only).
  - An electric shock or injury may result.

- Do not bend or pull the power cord with force. Be careful not to leave the power cord under a heavy object.
  - Damage to the cord may result in a fire or electric shock.

- Do not place the power cord or product near heat sources.
  - A fire or electric shock may result.

- Clean any dust around the pins of the power plug or the power socket with a dry cloth.
  - A fire may result.
Before Using the Product

Caution

Do not disconnect the power cord while the product is being used.
- The product may become damaged by an electric shock.

Only use the power cord provided with your product by Samsung. Do not use the power cord with other products.
- A fire or electric shock may result.

Keep the power socket where the power cord is connected unobstructed.
- The power cord must be disconnected to cut off power to the product when an issue occurs.
- Note that the product is not completely powered down by using only the power button on the remote.

Hold the plug when disconnecting the power cord from the power socket.
- An electric shock or fire may result.

Installation

Warning

DO NOT PLACE CANDLES, INSECT REPELLENTS OR CIGARETTES ON TOP OF THE PRODUCT. DO NOT INSTALL THE PRODUCT NEAR HEAT SOURCES.
- A fire may result.

Have a technician install the wall-mount hanger.
- Installation by an unqualified person can result in an injury.
- Only use approved cabinets.

Do not install the product in poorly ventilated spaces such as a bookcase or closet.
- An increased internal temperature may cause a fire.

Install the product at least 10cm away from the wall to allow ventilation.
- An increased internal temperature may cause a fire.
Keep the plastic packaging out of the reach of children.
- Children may suffocate.

Do not install the product on an unstable or vibrating surface (insecure shelf, sloped surface, etc.)
- The product may fall and become damaged and/or cause an injury.
- Using the product in an area with excess vibration may damage the product or cause a fire.

Do not install the product in a vehicle or a place exposed to dust, moisture (water drips, etc.), oil, or smoke.
- A fire or electric shock may result.

Do not expose the product to direct sunlight, heat, or a hot object such as a stove.
- The product lifespan may be reduced or a fire may result.

Do not install the product within the reach of young children.
- The product may fall and injure children.
- As the front is heavy, install the product on a flat and stable surface.

Bend and keep part of the outdoor TV antenna cable hanging downwards (the part inside the room) to prevent rainwater from entering the product.
- If rainwater enters the product, a fire or electric shock can occur.

When using an outdoor antenna, be sure to install the antenna away from nearby power lines to prevent the antenna from collapsing onto them in strong winds.
- A collapsed antenna can cause an electric shock or injury.

Edible oil, such as soybean oil, can damage or deform the product. Do not install the product in a kitchen or near a kitchen counter.
Caution

Do not drop the product while moving.
- Product failure or personal injury may result.

Do not set down the product on its front.
- The screen may become damaged.

When installing the product on a cabinet or shelf, make sure that the bottom edge of the front of the product is not protruding.
- The product may fall and become damaged and/or cause an injury.
- Install the product only on cabinets or shelves of the right size.

Set down the product gently
- Product failure or personal injury may result.

Installing the product in an unusual place (a place exposed to a lot of fine particles, chemical substances or extreme temperatures, or an airport or train station where the product should operate continuously for an extended period of time) may seriously affect its performance.
- Be sure to consult Samsung Customer Service Center if you want to install the product at such a place.

Operation

Warning

There is a high voltage inside the product. Never disassemble, repair or modify the product yourself.
- A fire or electric shock may result.
- Contact Samsung Customer Service Center for repairs.

Before moving the product, turn off the power switch and disconnect the power cord, antenna cable and all other connected cables.
- Damage to the cord may result in a fire or electric shock.
Before Using the Product

If the product generates abnormal sounds, a burning smell or smoke, disconnect the power cord immediately and contact Samsung Customer Service Center.

- An electric shock or fire may result.

Do not let children hang from the product or climb on top of it.

- Children may become injured or seriously harmed.

If the product is dropped or the outer case is damaged, turn off the power switch and disconnect the power cord. Then contact Samsung Customer Service Center.

- Continued use can result in a fire or electric shock.

Do not leave heavy objects or items that children like (toys, sweets, etc.) on top of the product.

- The product or heavy objects may fall as children try to reach for the toys or sweets resulting in a serious injury.

During a lightning or thunderstorm, power off the product and remove the power cable.

- A fire or electric shock may result.

Do not drop objects on the product or apply impact.

- A fire or electric shock may result.

Do not move the product by pulling the power cord or any cable.

- Product failure, an electric shock or fire may result from a damaged cable.

If a gas leakage is found, do not touch the product or power plug. Also, ventilate the area immediately.

- Sparks can cause an explosion or fire.

Do not lift or move the product by pulling the power cord or any cable.

- Product failure, an electric shock or fire may result from a damaged cable.

Do not use or keep combustible spray or an inflammable substance near the product.

- An explosion or fire may result.
Ensure the vents are not blocked by tablecloths or curtains.

- An increased internal temperature may cause a fire.

Do not insert metallic objects (chopsticks, coins, hairpins, etc) or objects that burn easily (paper, matches, etc) into the product (via the vent or input/output ports, etc).

- Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product. Then contact Samsung Customer Service Center.
- Product failure, an electric shock or fire may result.

Do not place objects containing liquid (vases, pots, bottles, etc) or metallic objects on top of the product.

- Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product. Then contact Samsung Customer Service Center.
- Product failure, an electric shock or fire may result.

**Caution**

Leaving the screen fixed on a stationary image for an extended period of time may cause afterimage burn-in or defective pixels.

- Activate power-saving mode or a moving-picture screen saver if you will not be using the product for an extended period of time.

Disconnect the power cord from the power socket if you do not plan on using the product for an extended period of time (vacation, etc).

- Dust accumulation combined with heat can cause a fire, electric shock or electric leakage.

Use the product at the recommended resolution and frequency.

- Your eyesight may deteriorate.

Do not hold the product upside-down or move it by holding the stand.

- The product may fall and become damaged or cause an injury.
Looking at the screen too close for an extended period of time can deteriorate your eyesight.

Do not use humidifiers or stoves around the product.

- A fire or electric shock may result.

Rest your eyes for more than 5 minutes for every 1 hour of product use.

- Eye fatigue will be relieved.

Do not touch the screen when the product has been turned on for an extended period of time as it will become hot.

Store small accessories out of the reach of children.

Exercise caution when adjusting the product angle or stand height.

- Your hand or finger may get stuck and injured.

- Tilting the product at an excessive angle may cause the product to fall and an injury may result.

Do not place heavy objects on the product.

- Product failure or personal injury may result.

When using headphones or earphones, do not turn the volume too high.

- Having the sound too loud may damage your hearing.

Be careful that children do not place the battery in their mouths when removed from the remote control. Place the battery in a location that children or infants cannot reach.

- If children have had the battery in their mouths, consult your doctor immediately.

Use only the specified standardized batteries, and do not use a new battery and a used battery at the same time.

- Otherwise, the batteries may be damaged or cause fire, personal injury or damage due to a leakage of the internal liquid.
Before Using the Product

When replacing the battery, insert it with the right polarity (+, -).

- Otherwise, the battery may become damaged or it may cause fire, personal injury or damage due to leakage of the internal liquid.

The batteries (and rechargeable batteries) are not ordinary refuse and must be returned for recycling purposes. The customer is responsible for returning the used or rechargeable batteries for recycling.

- The customer can return used or rechargeable batteries to a nearby public recycling center or to a store selling the same type of the battery or rechargeable battery.
1.1 Checking the Contents

1.1.1 Removing the Packaging

This image is for reference only.

1. Open the packaging box. Be careful not to damage the product when you open the packaging with a sharp instrument.

2. Remove the black locking device at the bottom of the box.

3. Using the grooves in the box, lift and remove the top of the box.

4. Check the components and remove the styrofoam and plastic bag.

The appearance of actual components may differ from the image shown.

5. Store the box in a dry area so that it can be used when moving the product in the future.
1.1.2 Checking the Components

- Contact the vendor where you purchased the product if any components are missing.
- The appearance of the components and items sold separately may differ from the image shown.
- A stand is not provided with the product. To install a stand, you can purchase one separately.

Components

Components may differ in different locations.

- Quick setup guide
- Warranty card (Not available in some locations)
- User manual
- MagicInfo Lite Edition Software CD
- Holder-Wire stand (ME65B model only)
- Holder-Ring (4EA) (ME65B model only)
- Power cord
- Remote Control (Not available in some locations)
- D-SUB cable
- RS232C(OUT) Adapter
- RS232C(IN) Adapter
- AV/Component Adapter
- External sensor KIT (ME65B model only)
- Double-sided tape (ME65B model only)
Preparations

The RS232C adapter can be used to connect to another monitor using the D-SUB (9-pin) type RS232C cable. Ensure you connect each of the adapters to the correct RS232C IN or OUT port on the product.

Items sold separately

- The stand is not supplied.
- The following items can be purchased at your nearest retailer.

</tbody>
</table>
Attaching the External sensor KIT to the side (ME65B model only)

- This External sensor KIT can be attached to any part of the display using the double-sided tape provided with the sensor.
- The External sensor KIT can also be attached to a wall near the display.
- Do not attach the External sensor KIT to the display if the display does not have plastic or metal sides. The display can be damaged.
1.2.3 Reverse Side

The color and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

Assembling the Holder-Wire stand (ME65B model only)

- Stand: Sold separately
1.2.4 Remote Control

- Using other display devices in the same space as the remote control of this product can cause the other display devices to be inadvertently controlled.
- Remote control button functions may differ for different products.
# Preparations

## Adjusting the OSD with the Remote Control

1. Open the OSD menu.

2. Select from **Picture**, **Sound**, **Media**, **Network**, **System** or **Support** in the displayed OSD menu screen.

3. Change settings as desired.

4. Finish setting.

5. Close the onscreen display (OSD) menu.

## To place batteries in the remote control

![Battery Placement Steps](image-url)
Remote Control Reception Range

Use the remote control within 7m to 10m from the sensor on the product at an angle of 30° from the left and right.

- Store used batteries out of reach of children and recycle.
- Do not use a new and used battery together. Replace both batteries at the same time.
- Remove batteries when the remote control is not to be used for an extended period of time.
1.2.5 Controlling more than one display product using an External sensor KIT

- Connect the [IR OUT] port on the product to the [IR / AMBIENT SENSOR IN] port on the other display product using the stereo cable.

- A command sent from the remote control pointed at product 1 (to which the External sensor KIT is connected) will be received by both display products 1 and 2.

* The appearance may differ depending on the product.
1.3 Before Installing the Product (Installation Guide)

1.3.1 Tilting Angle and Rotation

Contact Samsung Customer Service Center for further details.

A The product can be tilted at a maximum angle of 15° from a perpendicular wall surface.
B To use the product vertically (portrait), turn it clockwise so that the LED is pointing down.

1.3.2 Ventilation

1. Installation on a Perpendicular Wall

A Minimum 40 mm
B Ambient temperature: Under 35°C

- When installing the product on a perpendicular wall, allow at least 40 mm of space between the product and wall surface for ventilation and ensure that the ambient temperature is kept below 35°C.
2. Installation on an Indented Wall

Contact Samsung Customer Service Center for further details.

Figure 1.2  Side view

Figure 1.3  Top view

Plane view
A  Minimum 40 mm
B  Minimum 70 mm
C  Minimum 50 mm
D  Minimum 50 mm
E  Ambient temperature: Under 35°C

⚠️ When installing the product on an indented wall, allow at least the space specified above between the product and wall for ventilation and ensure that the ambient temperature is kept below 35°C.
1.4 Dimensions

All drawings are not necessarily to scale. Some dimensions are subject to change without prior notice. Refer to the dimensions prior to performing installation of your product. Not responsible for typographical or printed errors.

1.5 Installing the Wall Mount

1.5.1 Preparing before installing Wall-Mount

To install a wall-mount from another manufacturer, use the Holder-Ring. (ME65B model only)

1.5.2 Installing the Wall Mount Kit

The wall mount kit (sold separately) allows you to mount the product on the wall. For detailed information on installing the wall mount, see the instructions provided with the wall mount. We recommend you contact a technician for assistance when installing the wall mount bracket. Samsung Electronics is not responsible for any damage to the product or injury to yourself or others if you elect to install the wall mount on your own.

1.5.3 Wall Mount Kit Specifications (VESA)

Install your wall mount on a solid wall perpendicular to the floor. Before attaching the wall mount to surfaces other than plaster board, please contact your nearest dealer for additional information. If you install the product on a slanted wall, it may fall and result in severe personal injury.
• Standard dimensions for wall mount kits are shown in the table below.

• Samsung wall mount kits contain a detailed installation manual and all parts necessary for assembly are provided.

• Do not use screws that do not comply with the VESA standard screw specifications.

• Do not use screws that are longer than the standard length or do not comply with the VESA standard screw specifications. Screws that are too long may cause damage to the inside of the product.

• For wall mounts that do not comply with the VESA standard screw specifications, the length of the screws may differ depending on the wall mount specifications.

• Do not fasten the screws too firmly. This may damage the product or cause the product to fall, leading to personal injury. Samsung is not liable for these kinds of accidents.

• Samsung is not liable for product damage or personal injury when a non-VESA or non-specified wall mount is used or the consumer fails to follow the product installation instructions.

• Do not mount the product at more than a 15 degree tilt.

• Always have two people mount the product on a wall.

2.1 Before Connecting

Check the following before you connect this product with other devices. Devices that can be connected to this product include PCs, camcorders, speakers, set top boxes and DVD/Blu-ray Disc players.

2.1.1 Pre-connection Checkpoints

- Before connecting a source device, read the user manual provided with it. The number and locations of ports on source devices may differ from device to device.
- Do not connect the power cable until all connections are completed. Connecting the power cable during connection may damage the product.
- Connect the sound ports correctly: left = white and right = red.
- Check the types of ports at the back of the product you want to connect.
2.2 Connecting and Using a PC

2.2.1 Connecting to a PC

- Do not connect the power cable before connecting all other cables. Ensure you connect a source device first before connecting the power cable.
- A PC can be connected to the product in a variety of ways. Select a connection method suitable for your PC.

Connection parts may differ in different products.

Connection using the D-SUB cable (analog type)

Connection using a DVI cable (digital type)
Connection Using an HDMI-DVI Cable

When you connect a PC to the product using an HDMI-DVI cable, set Edit Name to DVI PC to access video and audio content stored on the PC.

Connection Using an HDMI Cable
Connection Using an DP Cable
2.2.2 Changing the Resolution

Adjust the resolution and refresh rate in Control Panel on your PC to obtain optimum picture quality. The picture quality of TFT-LCDs may degrade if the optimum resolution is not selected.

Changing the Resolution on Windows XP
Go to Control Panel → Display → Settings, and change the resolution.

Changing the Resolution on Windows Vista
Go to Control Panel → Personal Settings → Display Settings, and change the resolution.
Changing the Resolution on Windows 7

Go to **Control Panel** → **Display** → **Screen Resolution**, and change the resolution.
2.3 Connecting an External Monitor

- The Loopout function can be used to duplicate the screen of the primary display. Connect [DVI OUT] on the primary display to [DVI IN] or [HDMI IN] on another display.
- Up to Full HD resolution can be supported. Compatible input sources include DVI IN, DP IN and HDMI IN. Multiple monitors that are daisy-chained have a limit to the connectable monitors.
- The [DVI OUT] port on this product does not support the HDCP input.
2.4 Connecting to a Video Device

- Do not connect the power cable before connecting all other cables. Ensure you connect a source device first before connecting the power cable.
- You can connect a video device to the product using a cable.

  - Connecting parts may differ in different products.
  - After connecting a source device, press the SOURCE button on the remote control and select the connected source device.

2.4.1 Connection Using the AV Cable

2.4.2 Connection Using the Component Cable
2.4.3 Connection Using an HDMI-DVI Cable

- Audio will not be enabled if the product is connected to a video device using an HDMI-DVI cable. To resolve this, additionally connect an audio cable to the audio ports on the product and video device. When you connect a video device to the product using an HDMI-DVI cable, set Edit Name to DVI Device to access video and audio content stored on the video device.
- Supported resolutions include 1080p (50/60Hz), 720p (50/60Hz), 480p, and 576p.

2.4.4 Connection Using an HDMI Cable
Using an HDMI cable or HDMI to DVI Cable (up to 1080p)

- For better picture and audio quality, connect to a digital device using an HDMI cable.
- An HDMI cable supports digital video and audio signals, and does not require an audio cable.
  - To connect the TV to a digital device that does not support HDMI output, use an HDMI/DVI and audio cables.
- The picture may not display normally (if at all) or the audio may not work if an external device that uses an older version of HDMI mode is connected to the TV. If such a problem occurs, ask the manufacturer of the external device about the HDMI version and, if out of date, request an upgrade.
- Be sure to use an HDMI cable with a thickness of 14 mm or less.
- Be sure to purchase a certified HDMI cable. Otherwise, the picture may not display or a connection error may occur.
- A basic high-speed HDMI cable or one with ethernet is recommended. This product does not support the ethernet function via HDMI.
2.4.5 Connecting to an Audio System

2.4.6 Connecting to an Antenna

The initial settings process runs automatically when the product is turned on for the first time after purchase.

Take extra care to ensure the wires inside the cable do not bend.
2.5 Connecting the network box (Sold separately)

2.5.1 MagicInfo

To use MagicInfo, a network box (sold separately) must be connected to the product.

- For details on how to connect to a network box, refer to the user’s manual provided with the network box upon purchase.

- To change the MagicInfo settings, run "MagicinfoSetupWizard" on the desktop.

- For details on how to use MagicInfo, refer to the DVD provided with the network box.

- The information in this section is subject to change without notice for quality improvement.

- If a problem occurs after installing an operating system other than the one provided with the network box, restoring the previous version of the operating system, or installing software that is not compatible with the operating system provided, you will not be able to benefit from technical support and will be charged a fee for a visit from a service technician. A product exchange or refund will also not be available.

Entering MagicInfo mode

1. After installing and connecting the network box (sold separately) to the product, power on the product.

2. Press SOURCE on the remote control, and select MagicInfo.

Connecting the network box to the [HDMI IN] port on the product will change Source from HDMI to MagicInfo.
3 Select the default application you want to run when MagicInfo starts.

4 Enter the IP information.
5 Select a language. (The default language is English.)

![Select Language Wizard - step 3](image1)

6 Select a display mode.

![Select Screen Type - step 4](image2)
7. Double-check the settings you have just configured.

- If the execution icon does not appear, double-click the MagicInfo icon on the desktop. The icon will appear at the bottom right of the screen.
- For further details on how to use MagicInfo, refer to the MagicInfo Lite Edition software CD provided with the network box.
2.6 Changing the Input source

2.6.1 Source

MENU [ ] → Media → Source → ENTER [ ]

Source allows you to select a variety of sources and change source device names.

You can display the screen of a source device connected to the product. Select a source from Source List to display the screen of the selected source.

Refer to page 144 for details about the Source menu.

The input source can also be changed by using the SOURCE button on the remote control.

The screen may not display correctly if an incorrect source is selected for the source device you want to convert to.
Using MDC

MDC (Multiple Display Control) is an application that allows you to easily control multiple display devices simultaneously using a PC.

3.1 Configuring Settings for Multi Control

MENU \(\rightarrow\) System \(\rightarrow\) Multi Control \(\rightarrow\) ENTER

Assign an individual ID to your product.

3.1.1 Configuring settings for Multi Control

- **MDC Connection**
  Select a method to connect to MDC to receive the MDC signal.
  - **RS232C MDC**
    Communicate with MDC via the RS232C-stereo cable.
  - **RJ45 MDC**
    Communicate with MDC via the RJ45 cable.

- **ID Setup**
  Assign an ID to a set. (Range: 0~99)
  Press \(\uparrow\) or \(\downarrow\) to select a number, and press [\(\Rightarrow\)].

- **ID Input**
  Enter the ID number of the product connected to the input cable for input signal reception.
  Enter the number you want using the number buttons on the remote control.
3.2 MDC Program Installation/Uninstallation

3.2.1 Installation

1. Insert the installation CD into the CD-ROM drive.
2. Click the **MDC Unified** installation program.
   - If a software installation window is not displayed on the main screen, install with the **MDC Unified** execution file in the MDC folder on the CD.
3. Click "Next" in the displayed Installation Wizard screen.
4. In the "License Agreement" window displayed, select "I accept the terms in the license agreement" and click "Next".
5. In the displayed "Customer Information" window, fill out all the information fields and click "Next".
6. In the displayed "Destination Folder" window, select the directory path you want to install the program in and click "Next".
   - If the directory path is not specified, the program will be installed in the default directory path.
7. In the displayed "Ready to Install the Program" window, check the directory path to install the program in and click "Install".
8. Installation progress will be displayed.
9. Click "Finish" in the displayed "InstallShield Wizard Complete" window.
   - Select "Launch MDC Unified" and click "Finish" to run the MDC program immediately.
10. The **MDC Unified** shortcut icon will be created on the desktop after installation.

- The MDC execution icon may not be displayed depending on the PC system or product specifications.
- Press F5 if the execution icon is not displayed.

3.2.2 Uninstallation

1. Select **Settings > Control Panel** on the **Start** menu and double-click **Add/Delete Program**.
2. Select **MDC Unified** from the list and click **Change/Remove**.

    - MDC installation can be affected by the graphics card, mother board and network conditions.
3.3 What is MDC?

Multiple display control "MDC" is an application that allows you to easily control multiple display devices simultaneously using a PC.

3.3.1 Connecting to MDC

Using MDC via RS-232C (serial data communications standards)

An RS-232C serial cable must be connected to the serial ports on the PC and monitor.
Using MDC via Ethernet

Enter the IP for the primary display device and connect the device to the PC. One display device can connect to another using an RS-232C serial cable.

Connection using a direct LAN cable

Multiple products can be connected using the [RJ45] port on the product and the LAN ports on the HUB.

Connection using a cross LAN cable

Multiple products can be connected using the [RS232C IN / OUT] port on the product.
3.3.2 Connection Management

Connection management includes the **Connection list** and **Connection list modification options**.

**Connection list** - Connection list shows the details of the connections such as connection setting (IP/COM, Port No, MAC, and **Connection Type**), connection status, **Set ID Range**, and detected devices. Each connection can contain a maximum of 100 devices connected in serial daisy-chain fashion. All the LFDs detected in a connection are displayed in the Device list, where the user can make groups and send commands to detected devices.

**Connection list modification options** - Connection modification options includes **Add**, **Edit**, **Delete**, and **Refresh**.
3.3.3 Auto Set ID

Auto Set ID feature assigns a Set ID for all the LFDs connected in daisy-chain of a selected connection. There can be a maximum of 100 LFDs in a connection. The Set ID is assigned sequentially in the daisy-chain running from 1 to 99, and then finally to Set ID 0.
3.3.4 Cloning

Using the Cloning feature, you can copy the setting of one LFD and apply it to multiple selected LFDs. You can select specific tab categories or all tab categories for cloning, using the copy setting option window.
3.3.5 Command Retry

This feature is used to specify the maximum number of times the MDC command will be retried in case of there being no reply or a corrupted reply from an LFD. The retry count value can be set using the MDC options window. The retry count value must be between 1-10. The default value is 1.
3.3.6 Getting Started with MDC

1. To start the program, click **Start → Programs → Samsung → MDC Unified**.

2. Click **Add** to add a display device.
   - If the connection is established via RS232C, go to **Serial** and specify the **COM Port**.
If the connection is established via Ethernet, enter the IP that was entered for the display device.
3.3.7 Main Screen Layout

1. **Menu Bar**
   Change the status of a display device or the properties of the program.

2. **Device Category**
   View a list of connected display devices or device groups.

3. **Schedule Category**
   View a list of schedules for display devices.

4. **Set List**
   Select the display device you want to adjust.

5. **Modify the Set List**
   Add, edit, regroup or delete sets.

6. **Help Topics**
   Display help topics for the program.
3.3.8 Menus

You can power on or off a selected device or change the input source or volume of the device. Choose display devices from the list of sets, and select the Home tab.

1 Home

Select an item and change the corresponding setting.

Power
- **On**: Power on a selected display.
- **Off**: Power off a selected display.

Input
- **Input Source**: Change the input source.
  - Input sources available can vary depending on the Display Device Models.
  - The input source can be changed only for displays that are turned on.
- **Channel**: Change the channel.
  - The TV channel can be changed by using the up/down arrow keys.
  - The channel can be changed only when the input source is TV.
  - Only registered channels can be selected.

2 Volume

The volume can be changed or the sound can be muted only for displays that are turned on.

**Volume**
- The volume can be adjusted using the slider bar in the range of 0 to 100.
  - Adjust the volume of a selected display.

**Mute**
- Enable or disable Mute for a selected display.
  - Mute will automatically be disabled if Volume is adjusted when Mute is on.
3 Alert

- **Fault Device**
  - This menu shows a list of display devices which have following errors - fan error, temperature error, brightness sensor error, or lamp error.
  - Select a display device from the list. The Repair button will be enabled. Click the refresh button to refresh the error status of the display device. The recovered display device will disappear from the Fault Device List.

- **Fault Device Alert**
  - Display device in which error is detected will be reported by email.
  - Fill in all required fields. The Test and OK buttons will be enabled. Ensure the Sender information and at least one Recipient are entered.
3.3.9 Screen Adjustment

The screen settings (contrast, brightness, etc.) can be adjusted.

Choose display devices from the list of sets, and select the Picture tab.

**Custom**

Select an item and change the corresponding screen setting.

- **Color** and **Tint** are not available if the input source is **PC**.
- **Red**, **Green**, **Blue** and **PC Screen Adjustment** are not available if the input source is **Video**.
- **Color**, **Tint**, **Color Tone**, **Color Temp**, **Red**, **Green**, **Blue** and **PC Screen Adjustment** are not available if both **PC Source** and **Video Source** are selected.

**Picture Mode**

- Adjust the picture mode for the selected display device.

**Contrast**

- Adjust the contrast for the selected display device.

**Brightness**

- Adjust the brightness for the selected display device.

**Color**

- Adjust the colors for the selected display device.

**Tint (G/R)**

- Adjust the tint for the selected display device.

**Color Tone**

- Adjust the background color tone for the selected display device.

**Color Temp**

- Adjust the color temperature for the selected display device.

  - This option is enabled if **Color Tone** is set to **Off**.

**Red**

- Customize the intensity of red color for the selected display device.
Using MDC

Green
- Customize the intensity of green color for the selected display device.

Blue
- Customize the intensity of blue color for the selected display device.

Options

Dynamic Contrast
Adjust the **Dynamic Contrast** for the selected display device.

Gamma Control
Change the gamma value for the selected display.

Auto Motion Plus
This option is used to view dynamic images.
- **Off**: Disable the **Auto Motion Plus** function.
- **Clear**: Set the level of **Auto Motion Plus** to clear. This mode is suitable to display vivid images.
- **Standard**: Set the level of **Auto Motion Plus** to standard.
- **Smooth**: Set the level of **Auto Motion Plus** to smooth. This mode is suitable to display smooth images.
- **Custom**: Customize the level of screen burn-in or flickering.
- **Demo**: This function demonstrates the technology of **Auto Motion Plus**. The result when the mode is changed can be previewed on the left side of the window.

Brightness Sensor
Enable or disable the **Brightness Sensor** for the selected display device.

The **Brightness Sensor** detects the ambient light intensity and automatically adjusts the screen brightness.

* Brightness Sensor may not be available depending on the product.

HDMI Black Level
Adjust the **HDMI Black Level** for the selected display device.
Using MDC

Size

Adjust the screen size for the selected display device.

The Detail item will be disabled if Picture Size is set to a mode that does not support detailed configuration.

The +/- buttons can be used to adjust Zoom.

The screen can be relocated using the up/down/left/right buttons.

Detail

You can view details of the selected screen size.

PC Screen Adjustment

Frequency adjustment or fine-tuning is available by using the +/- buttons in Coarse or Fine.

To relocate the screen, click one of the four images below Position.

To automatically adjust the frequency, fine-tune or relocate the screen, click Auto Adjustment.
3.3.10 Sound Adjustment

You can change the sound settings.

Choose display devices from the list of sets, and select the Sound tab.

The Bass or Treble item will be disabled if the item is not supported by the selected set.

Bass

Adjust the bass for the selected display.

Treble

Adjust the treble for the selected display.

Balance(L/R)

Adjust the volume of the left and right speakers of the selected display device.

SRS TS XT

Enable or disable the SRS TS XT effect for the selected display device.
3.3.11 System Setup

Choose display devices from the list of sets, and select the System tab.

Video Wall

The Video Wall function can be used to display part of a whole picture or repeat the same picture on each of connected multiple display devices.

Video Wall is enabled only when devices are in the group.

Enable or disable Video Wall.

Format

Select the format to display the split screen.
Using MDC

H
Select the number of horizontal display devices.
A maximum of 15 displays can be arranged in a row.

A maximum of 6 can be assigned to V if 15 is assigned to H.

V
Select the number of vertical display devices.
A maximum of 15 displays can be arranged in a row.

A maximum of 6 can be assigned to V if 15 is assigned to H.

Screen Position

View the layout of displays (configured by the screen divider) or change the layout as required.

Screen Position and Preview are enabled when Video Wall is set to on.

Note that if multiple sets are selected, Preview is enabled only if the settings for H and V match the layout of the selected sets.

To change the Position, select a set and drag it to a new position.

The range of screen divider settings may differ depending on the model.
**Using MDC**

**PIP**

Basic information required to adjust PIP will appear in the menu screen.

- PIP will be disabled when Video Wall is ON.
- Note that Picture Size is disabled when PIP is ON.

**PIP Size**

View the PIP Size of the current display.

**PIP Source**

Select a PIP input source.

**Sound Select**

Select and enable the sound from either the primary screen or secondary screen.

**Channel**

The channel can be changed if PIP Source is TV.
General

Using MDC

Using MDC

General

User Auto Color
Automatically adjust the screen colors.

Available only in **PC** mode.

Auto Power
Set the product to automatically power on.

Standby Control
Set the standby mode to activate if an input source is not detected.

Fan & Temperature

Configure the settings required to detect the fan speed and internal temperature for the product’s protection.

Fan Control
Select a method to configure the fan speed.

Fan Speed
Configure the fan speed.

Temperature
Detect the internal temperature by specifying the range of temperature.
Security

Safety Lock
Lock the on-screen menus.

To unlock the menus, set **Safety Lock** to **Off**.

Button Lock
Lock the buttons on the display device.

To unlock the buttons, set **Button Lock** to **Off**.

OSD Display

Source OSD
Select whether to display a message when the **Source** is changed.

Not Optimum Mode OSD
Select whether to display a message when a non-compatible mode is selected.

No Signal OSD
Select whether to display a message when there is no input signal.

MDC OSD
Select whether to display a message when settings are changed by the MDC.
Using MDC

Time

Clock Set

Change the current time on the selected display device according to the time set on a PC.
If the time is not set on the display device, null values will be displayed.

Timer

- **On Time**: Set the time to power on the selected display device.
- **Off Time**: Set the time to power off the selected display device.
- **Volume**: Specify the volume of the display device when it is powered on by **On Time**.
- **Source**: Specify the input source of the display device when it is powered on by **On Time**.
- **Holiday**: The **Holiday Management** settings can be applied to the **Timer**.
- **Repeat**: Specify the period for which you want to repeat the selected **Timer**.
Using MDC

- **Once:** Activate the timer only one time.
- **EveryDay:** Activate the timer every day.
- **Mon-Fri:** Activate the timer from Monday through Friday.
- **Mon-Sat:** Activate the timer from Monday through Saturday.
- **Sat-Sun:** Activate the timer on Saturdays and Sundays.
- **Manual:** Customize days of the week.

The checkboxes to select days of the week below Repeat are enabled only if Manual is selected.

**Holiday Management**

**Holiday Management** allows you to prevent devices that are set to be powered on by the **Timer** from turning on at a specified date.

*Holiday Management* function can be enabled or disabled in the **Timer** settings menu.

- **Add:** You can specify holidays:
  
  Click the **Add** button in the **Holiday Management** window.

- **Delete:** Delete holidays. Check the corresponding checkboxes and click this button.
- **List of holidays:** View a list of holidays you have added.
Screen Burn Protection

Pixel Shift

Move the screen slightly at specified time intervals to prevent screen burn-in.

Screen Saver

This function prevents screen burn-in when the screen of the selected display device is left idle for an extended period of time.

- **Interval**: Set the interval to activate the Screen Saver.
- **Mode**: The Time setting can vary for each Mode.
Safety Screen

The Safety Screen function can be used to prevent screen burn-in when a stationary image displays on the screen of a display device for an extended period of time.

Lamp Control

Lamp Control is used to adjust the backlight to reduce power consumption.

Automatically adjust the backlight of the selected display device at a specified time.

If Manual Lamp Control is adjusted, Auto Lamp Control will automatically switch to Off.

Manually adjust the backlight for the selected display.

If Auto Lamp Control is adjusted, Manual Lamp Control will automatically switch to Off.

- Ambient Light: Ambient Light detects ambient light intensity and automatically adjusts the screen brightness of all the LFDs in the same serial chain.
3.3.12 Tool Settings

1. **Security**

Panel Control
Turn on or off the screen of a display device.

Remote Control
Enable or disable the remote control.

2. **Reset**

Reset Picture
Reset the screen settings.

Reset Sound
Reset the sound settings.

Reset System
Reset the system settings.

Reset All
Reset the screen, sound and system settings at the same time.
3 Edit Column

Select the items you want to display in the list of sets.

4 Information

View the program information.
3.3.13 Other Functions

Resizing a Window

Place the mouse pointer on a corner of the program window. An arrow will appear. Move the arrow to customize the size of the program window.
Group Management

Creating Groups

Create groups and manage the list of sets on a group basis.

- Duplicate group names cannot be used.

1. Right-click and select **Group → Edit** in the display device list section on the left side of the program window.

2. In the **Edit Group** window displayed, click **Add on the same level** or **Add on the sub level**.
   - **Add on the same level**: Create a group on the same level as the selected group.

The **Add on the same level** button is enabled only if at least one group is created.
Using MDC

- **Add on the sub level**: Create a sub-group under the selected group.

![Edit Group window](image)

3 Enter the group name.

Deleting Groups

1 Select a group name, and click **Edit**.
2 In the **Edit Group** window displayed, click **Delete**.

![Edit Group window](image)

3 Click **Yes**. The group will be deleted.

Renaming Groups

1 Select a group name, and click **Edit**.
2 In the **Edit Group** window displayed, click **Rename**.

![Edit Group window](image)

3 If a cursor appears in the old group name, enter a new group name.
Schedule Management

Creating Schedules

Create and register a schedule on a group basis.

1. Click All Schedule List in the schedule section on the left side of the program window. The Add button will be enabled in the middle.

2. Click the Add button. The Add Schedule window will appear.
3 Click Add below the Device Group item, and select the group you want to add a schedule to.

4 Select Date&Time/Action and click OK. The schedule will be added and a list of schedules will appear in the set list window.

- Device Group: Select a group.
- Date&Time
  - Instant Execution: Run the schedule immediately.
  - Timer: Set the date, time and interval to run the schedule.
- Action: Select a function that will activate at the specified time and interval.

Schedule Modification
To modify a schedule, select the schedule and click Edit.

Deleting a Schedule
To delete a schedule, select the schedule and click Delete.
### Troubleshooting Guide

<table>
<thead>
<tr>
<th>Issue</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The display you want to control does not appear on the system information chart.</td>
<td>1. Check the connection of the RS232C cable (check that the cable is properly connected to appropriate serial port).</td>
</tr>
<tr>
<td></td>
<td>2. Check that another display with a duplicate ID is not connected. Connecting displays with a duplicate ID can cause the displays not to be shown due to data collision.</td>
</tr>
<tr>
<td></td>
<td>3. Check that the display ID is within the range of 0 and 99. (Change the ID using the Display menu.) For a display that supports the ID in a range of 0 to 99, the ID should be set between 0 and 99.</td>
</tr>
<tr>
<td>The display you want to control does not appear on the other Control Info Grids.</td>
<td>Check that the display is powered on. (See the power status in the system information chart.)</td>
</tr>
<tr>
<td>The following message appears repeatedly.</td>
<td>Check that the display you want to control is selected.</td>
</tr>
<tr>
<td>Displays power on or off at different time from one another even though On Time or Off Time is set.</td>
<td>Adjust the time on the PC to synchronize the time between the connected displays.</td>
</tr>
<tr>
<td>The remote control does not work.</td>
<td>The remote control may not work if the RS-232C cable is removed or the program is closed abnormally while the Remote Control function is Disable. To resolve this, run the program again and set Remote Control to Enable.</td>
</tr>
</tbody>
</table>

This program may malfunction sometimes due to a communication problem between the PC and display or electromagnetic waves emitted from nearby electronic devices.
How display properties are shown when multiple displays are used

1. When no display is selected: The default value is displayed.
2. When one display is selected: Settings for the selected display are displayed.
3. When two displays are selected (e.g. in sequence of ID 1 and ID 3): The settings for ID 1 are displayed before the settings for ID 3.
4. When the All-Select checkbox is checked and all displays are selected: The default settings are displayed.
Screen Adjustment

Configure the Picture settings (Brightness, Color Tone, etc.).

The layout of the Picture menu options may vary depending on the product.

4.1 Picture Mode

MENU → Picture → Picture Mode → ENTER

Select a picture mode (Picture Mode) suitable for the environment where the product will be used. Different Picture Mode options are displayed depending on the current input source.

4.1.1 If the input source is PC, DVI or DisplayPort

- Information: This mode reduces eye fatigue and is suitable for displaying information to the public.
- Advertisement: This mode is suitable for displaying video content and indoor/outdoor advertisements.

4.1.2 If the input source is AV, Component, HDMI or TV

- Dynamic: This mode is suitable when the ambient light is bright.
- Standard: This mode is generally suitable for any environment.
- Natural: Suitable for reducing eye strain.
- Movie: This mode reduces eye fatigue.
Screen Adjustment

- **BD Wise:** Provides the optimal picture quality for Samsung DVD, Blu-ray and Home Theater products which support BD Wise. When BD Wise is turned On, the picture mode is automatically changed to the optimal resolution.

  Available when you connect Samsung products that support BD Wise through an HDMI cable to the product.

### 4.2 Backlight / Contrast / Brightness / Sharpness / Color / Tint (G/R)

![MENU] → Picture → ENTER

Your monitor has several options for adjusting picture quality.

- When you make changes to Backlight, Contrast, Brightness, Sharpness, Color or Tint (G/R), the OSD will be adjusted accordingly.
- When connecting a PC, you can only make changes to Backlight, Contrast, Brightness, and Sharpness.
- You can adjust and store Settings for each external device connected to the product.
- Lowering picture brightness reduces power consumption.
4.3  Screen Adjustment

If you have a cable box or satellite receiver, it may have its own set of screen sizes as well. However, we highly recommend you use your product's 16:9 mode most of the time.

- **16:9**: Sets the picture to 16:9 wide mode.
- **Zoom1**: Use for moderate magnification. Cuts off the top and sides.
- **Zoom2**: Use for a stronger magnification.
- **Smart View 1**: Reduces the 16:9 picture by 50%.
- **Smart View 2**: Reduces the 16:9 picture by 25%.
- **Wide Fit**: Enlarges the aspect ratio of the picture to fit the entire screen.
- **4:3**: Sets the picture to basic (4:3) mode.

Do not set your product to 4:3 format for a long time. The borders displayed on the left and right, or top and bottom of the screen may cause image retention (screen burn) which is not covered by the warranty.

- **Screen Fit**: Displays the full image without any cut-off when HDMI (720p / 1080i / 1080p) or Component (1080i / 1080p) signals are inputted.
Screen Adjustment

- **Custom**: Changes the resolution to suit the user’s preferences.
- **Original Ratio**: If the input source is PC, DVI, HDMI (PC connection), or DP, the video will display in the original aspect ratio.

Available ports may differ depending on the model. (page 29)

You can adjust and store settings for each external device you have connected to an input on the product.

**Picture Sizes available by Input Source.**

<table>
<thead>
<tr>
<th>Input Source</th>
<th>Picture Size</th>
</tr>
</thead>
<tbody>
<tr>
<td>ATV</td>
<td>16:9, Zoom1, Zoom2, 4:3</td>
</tr>
<tr>
<td>AV, Component (480i, 480p)</td>
<td>16:9, Zoom1, Zoom2, 4:3, Custom</td>
</tr>
<tr>
<td>DTV (1080i)</td>
<td>16:9, 4:3, Smart View 2, Wide Fit, Screen Fit</td>
</tr>
<tr>
<td>Component (1080i, 1080p)</td>
<td>16:9, 4:3, Wide Fit, Screen Fit, Custom</td>
</tr>
<tr>
<td>HDMI (720p, 1080i, 1080p)</td>
<td>16:9, 4:3, Wide Fit, Screen Fit, Smart View 1,</td>
</tr>
<tr>
<td>PC, DVI, DP, HDMI (when a PC is connected)</td>
<td>16:9, 4:3, Original Ratio</td>
</tr>
</tbody>
</table>
4.3.2 Position

Adjusts the picture position. **Position** is only available if **Picture Size** is set to **Zoom1, Zoom2, Wide Fit, Screen fit** or **Custom**.

- To use the **Position** function after selecting **Zoom1, Zoom2, Wide Fit, Screen fit** or **Custom**, follow these steps.
  1. Press the ▼ button to select **Position**. Press the [OK] button.
  2. Press the ▲ or ▼ button to move the picture up or down.
  3. Press the [OK] button.

- To use the **Position** function after selecting **Screen Fit** in **HDMI (1080i/1080p)** or **Component (1080i/1080p)** or **Custom**, follow these steps.
  1. Press the ▼ button to select **Position**. Press the [OK] button.
  2. Press the ▲/▼/◄/► button to move the picture.
  3. Press the [OK] button.

If you want to reset the picture to its original position, select **Reset** in the **Position** screen. The picture will be set to its default position.

4.3.3 PC Screen Adjustment

- Available in **PC** mode only.

**Coarse / Fine**: Removes or reduces picture noise. If the noise is not removed by Fine-tuning alone, use the **Coarse** function to adjust the frequency as best as possible (Coarse) and Fine-tune again. After the noise has been reduced, re-adjust the picture so that it is aligned with the center of screen.

**Position**: To adjust the PC’s screen position if it is not centered or does not fit the product screen. Press the ▲ or ▼ button to adjust the Vertical Position. Press the ◄ or ► button to adjust the Horizontal Position.

**Image Reset**: Resets the image to the default settings.

4.3.4 Resolution Select

If the picture is not normal even when the resolution of the graphics card is one of the following, you can optimize the picture quality by selecting the same resolution for the product as the PC using this menu.

**Available resolutions**: Off / 1024 x 768 / 1280 x 768 / 1360 x 768 / 1366 x 768

- The **Resolution Select** option is only enabled when the input source is **PC**.
4.4 Auto Adjustment

Adjust frequency values/positions and fine tune the settings automatically.

This option is available when the input source is PC.

4.5 Using the 3D function (ME75B model only)

This exciting new feature enables you to view 3D content. In order to fully enjoy this feature, you must purchase a pair of Samsung 3D Active Glasses to view 3D video.

4.5.1 3D Mode

4.5.2 Viewing product Using the 3D function

IMPORTANT HEALTH AND SAFETY INFORMATION FOR 3D PICTURES. Read and understand the following safety information before using the 3D function.

Warning
- Some viewers may experience discomfort while viewing 3D product such as dizziness, nausea and headaches. If you experience any such symptom, stop viewing 3D product, remove 3D Active Glasses and rest.
- Watching 3D images for an extended period of time may cause eye strain. If you feel eye strain, stop viewing 3D product, remove your 3D Active Glasses and rest.
- A responsible adult should frequently check on children who are using the 3D function. If there are any reports of tired eyes, headaches, dizziness, or nausea, have the child stop viewing 3D product and rest.
- Do not use the 3D Active Glasses for other purposes (such as general eyeglasses, sunglasses, protective goggles, etc.)
- Do not use the 3D function or 3D Active Glasses while walking or moving around. Using the 3D function or 3D Active Glasses while moving around may result in injuries due to running into objects, tripping, and/or falling.
- 3D Mode: Select the 3D input format.
If you want to feel the 3D effect fully, please wear the 3D Active Glasses first, and then select 3D Mode from the list below that provides the best 3D viewing experience.

When watching 3D images, turn on 3D Active Glasses.

<table>
<thead>
<tr>
<th>3D Mode</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Turns the 3D function off.</td>
</tr>
<tr>
<td>2D → 3D</td>
<td>Changes a 2D image to 3D.</td>
</tr>
<tr>
<td>Side by Side</td>
<td>Displays two images next to each other.</td>
</tr>
<tr>
<td>Top &amp; Bottom</td>
<td>Displays one image above another.</td>
</tr>
<tr>
<td>Line by Line</td>
<td>Displays the images for the left and right eye alternately in rows.</td>
</tr>
<tr>
<td>Vertical Stripe</td>
<td>Displays the images for the left and right eye alternately in columns.</td>
</tr>
<tr>
<td>Checker Board</td>
<td>Displays the images for the left and right eye alternately in pixels.</td>
</tr>
<tr>
<td>Frame Sequential</td>
<td>Displays the images for the left and right eye alternately in frames.</td>
</tr>
</tbody>
</table>

Some file format may not supported the “2D → 3D.”

“Side by Side” and “Top & Bottom” are available when the resolution is 720p, 1080i and 1080p in HDMI and USB mode or when set to PC and the PC is connected through an HDMI / DVI cable.

“Vertical Stripe”, “Line by Line” and “Checker Board” are available when the resolution is set to PC and the PC is connected through an HDMI / DVI cable.

“Frame Sequential” displays the frequency (60Hz only) when the resolution is set to PC.

- **3D Effect**: Adjust 3D effects like perspective and depth for your preferred 3D viewing experience.
  - **Auto**: Automatically adjust the perspective and depth settings in accordance with the 3D input source.
  - **Manual**: Manually adjust the perspective and depth settings.
    - **3D Perspective (-5 ~ +5)**: Adjust overall 3D perspective of on-screen image.
    - **Depth (1 ~ 10)**: Adjust overall depth.

- **L/R Change (L/R Image / R/L Image)**: Swap the left and right pictures.

- **3D → 2D (Off / On)**: Displays the image for the left eye only.

  This function is deactivated when **3D Mode** set to “2D → 3D” or Off.

- **3D Auto View (Off / Message Notice / On)**: If **3D Auto View** is set to **On**, a “Side by Side” format HDMI signal with one of the resolutions below is automatically switched to 3D. If you set **3D Auto View** to **Message Notice**, a pop up message window appears when the product receives a 3D signal.
If a 3D failure occurs due to a 3D information error, set 3D Auto View to Off and manually select a 3D Mode using the corresponding menu.

- **3D Optimize**: The overall adjustment of 3D effect.

Support resolution (16:9 only)

<table>
<thead>
<tr>
<th>Resolution</th>
<th>Frequency (Hz)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1280 x 720p</td>
<td>25 / 50 Hz</td>
</tr>
<tr>
<td>1920 x 1080i</td>
<td>25 / 50 Hz</td>
</tr>
<tr>
<td>1920 x 1080p</td>
<td>25 / 50 Hz</td>
</tr>
</tbody>
</table>

Resolution supported for HDMI PC mode

The resolution for HDMI PC mode is optimized to 1920 x 1080 input.

An input resolution other than 1920 x 1080 may not be displayed properly in 3D display or full screen mode.

How to watch the 3D image

- **Method 1**

  - Some 3D modes may not be available depending on the format of the image source.
  - To watch in 3D, wear 3D Active Glasses and press the power button on the glasses.

1. Press the **MENU** button on your remote, use the ▲ or ▼ button to select **Picture**, and then press the [确认] button.
2. Use the ▲ or ▼ button to select **3D**, and then press the [确认] button.
3. Use the ▲ or ▼ button to select **3D Mode**, and then press the [确认] button.
4. Using the ◀ or ▶ buttons on your remote control, select the **3D Mode** of the image you want to view.
Supported formats and operating specifications for Standard HDMI 3D

The 3D formats indicated below are recommended by the HDMI association and must be supported.

<table>
<thead>
<tr>
<th>Source signal format</th>
<th>Standard HDMI 1.4 3D</th>
</tr>
</thead>
<tbody>
<tr>
<td>1920 x 1080p @ 24 Hz x 2</td>
<td>1920 x 2205p @ 24 Hz</td>
</tr>
<tr>
<td>1280 x 720p @ 50 / 60 Hz x 2</td>
<td>1280 x 1470p @ 50 / 60 Hz</td>
</tr>
</tbody>
</table>

For the Standard HDMI 3D format with 24Hz, the product is optimized as follows.

- **Judder Reduction** Display Mode: When **Auto Motion Plus** is set to **Smooth** or **Custom**, you can watch a smooth picture without judder.

**Before using 3D function**

- **3D Mode** is set to its memorized configuration value automatically when you changing the input source.
- Some **Picture** functions are disabled in **3D** mode.
- **PIP** is not supported in **3D** mode.
- **3D Active Glasses** from Samsung’s previous product (IR type) or other manufacturers not be supported.
- When the product is initially powered on, may take some time until the 3D display is optimized.
- **The 3D Active Glasses** may not work properly if there is any other 3D product or electronic devices turned on near the glasses or product. If there is a problem, keep other electronic devices as far away as possible from the 3D Active Glasses.
- Some files are not supported in the 2D to 3D function.
- Be sure to stay within the viewing angle and optimum product viewing distance when watching 3D pictures. Otherwise, you may not be able to enjoy proper 3D effects.
- The ideal viewing distance should be three times or more the height of the screen. We recommend sitting with viewer’s eyes on a level with the screen.
4.6 Advanced Settings

MENU (1) → Picture → Advanced Settings → ENTER (2)

All Advanced Settings are available in the Standard and Movie modes. To use, select an option using the up and down arrow keys, and then press [ ]. Use the arrow keys to change the value or setting, and then press [ ].

In PC mode, you can only make changes to Gamma and White Balance.

The displayed image may differ depending on the model.

4.6.1 Black Tone
Select the black level to adjust the screen depth.
- Off / Dark / Darker / Darkest

4.6.2 Dynamic Contrast
Adjust the screen contrast.
- Off / Low / Medium / High

4.6.3 Shadow Detail
Increase the brightness of dark images.
4.6.4 Gamma

Adjust the primary color intensity.

4.6.5 Expert Pattern

Use the Expert Pattern function to calibrate the picture. If the OSD menu disappears or a menu other than the Picture menu is opened, the product saves the calibration and the Expert Pattern screen disappears.

- Off
  Turns the Expert Pattern function off.

- Pattern1
  This test screen demonstrates the effect of the display settings on shades of grey and black.

- Pattern2
  This test screen demonstrates the effect of the display settings on colors.

- After selecting Pattern1 or Pattern2, you can adjust any of the advanced settings for desired effect.
- While the Expert Pattern is running, sound is not outputted.
- Only enabled on DTV, Component, HDMI modes.

4.6.6 RGB Only Mode

Displays the Red, Green and Blue color for making fine adjustments to the hue and saturation.

- Off / Red / Green / Blue

4.6.7 Color Space

Adjusts the range and variety of colors (the color space) available to create images.

- Auto / Native / Custom

To adjust Color, Red, Green, Blue and Reset, set Color Space to Custom.

4.6.8 White Balance

Adjust the color temperature for a more natural picture.

- R-Offset / G-Offset / B-Offset: Adjust each color’s (red, green, blue) darkness.
- R-Gain / G-Gain / B-Gain: Adjust each color’s (red, green, blue) brightness.
- Reset: Resets the White Balance to it’s default settings.
4.6.9  10p White Balance (Off / On)

Controls the white balance in 10 point interval by adjusting the red, green, and blue brightness.

- **Interval**: Select interval to adjust.
- **Red**: Adjust the red level.
- **Green**: Adjust the green level.
- **Blue**: Adjust the blue level.
- **Reset**: Resets the 10p White Balance to its default settings.

- Available when the Picture Mode is set to Movie and when the external input is set to all input.
- Some external devices may not support this function.

4.6.10  Flesh Tone

Emphasize pink Flesh Tone.

4.6.11  Edge Enhancement (Off / On)

Emphasize object boundaries.

4.6.12  Motion Lighting (Off / On)

Reduces power consumption by reducing screen brightness when the picture on the screen is in motion.

4.6.13  LED Motion Plus (Off / On)

Removes blur and judder from scenes with large amounts of rapid movement to provide a clearer picture.
4.7 Picture Options

MENU -> Picture -> Picture Options -> ENTER

Select an option using the ▲ and ▼ arrow keys, and the press [ENT]. Use the arrow keys to change the setting, and then press [ENT].

In PC mode, you can only make changes to the Color Tone.

<table>
<thead>
<tr>
<th>Option</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Color Tone</td>
<td>Off</td>
</tr>
<tr>
<td>Color Temp.</td>
<td>10000K</td>
</tr>
<tr>
<td>Digital Noise Filter</td>
<td>Auto</td>
</tr>
<tr>
<td>MPEG Noise Filter</td>
<td>Auto</td>
</tr>
<tr>
<td>HDMI Black Level</td>
<td>Low</td>
</tr>
<tr>
<td>Filim Mode</td>
<td>Off</td>
</tr>
<tr>
<td>Auto Motion Plus</td>
<td>Standard</td>
</tr>
</tbody>
</table>

The displayed image may differ depending on the model.

4.7.1 Color Tone

- Off / Cool / Standard / Warm1 / Warm2

- Warm1 or Warm2 will be deactivated when the Picture Mode is Movie.
- Settings can be adjusted and stored for each external device connected to an input on the product.

4.7.2 Color Temp.

Adjust the color temperature (Red/Green/Blue). (Range: 3000K–15000K)

This option is available when mode is set to Color Tone are set to Off.
4.7.3 Digital Noise Filter

If the broadcast signal received by your product is weak, you can activate the Digital Noise Filter feature to reduce any static and ghosting that may appear on the screen.

- **Off / Low / Medium / High / Auto / Auto Visualization**
- **Auto Visualization**: When changing analog channels, displays signal strength.
  - Only available for analog channels.
  - When bar is green, is that the best possible signal.

When the signal is weak, try all the options until the product displays the best picture.

4.7.4 MPEG Noise Filter

Reduces MPEG noise to provide improved picture quality.

- **Off / Low / Medium / High / Auto**

4.7.5 HDMI Black Level

Selects the black level on the screen to adjust the screen depth.

- **Normal / Low**

Available only in **HDMI** mode.

4.7.6 Film Mode

Sets the product to automatically sense and process film signals from all sources and adjust the picture for optimum quality.

- **Off / Auto1 / Auto2**

Available in **TV, AV, COMPONENT (480i / 1080i)** and **HDMI (480i / 1080i)**.
4.7.7  Auto Motion Plus

Removes blur and judder from scenes with larger amounts of rapid movement to provide a clearer picture.

The menu names may vary depending on the country.

This feature can be used to view fast moving scenes.

- **Off**: Switches Auto Motion Plus off.
- **Clear**: Sets Auto Motion Plus to Clear (suitable for viewing moving images clearly) mode.
- **Standard**: Sets Auto Motion Plus to Standard mode.
- **Smooth**: Sets Auto Motion Plus to Smooth (suitable for viewing moving images naturally) mode.
- **Custom**: Use to reduce the afterimage and judder as much as you want.
- **Demo**: Demonstrates Auto Motion Plus (the picture will be displayed on the left half of the screen when Auto Motion Plus is set to On).
- **Blur Reduction**: Use to reduce the afterimage as much as you want. This is only supported if the Auto Motion Plus is set to Custom.
- **Judder Reduction**: Use to reduce the judder as much as you want. This is only supported if the Auto Motion Plus is set to Custom.
- **Reset**: Restore Auto Motion Plus settings to default values.

- The color on screen may vary with this option unintentionally.
- Disabled when PIP is set to On.

4.8  Reset Picture

MENU → Picture → Reset Picture → ENTER

Resets your current picture mode to its default settings.
Configure the sound (Sound) settings for the product.

5.1 Sound Mode

MENU  →  Sound  →  Sound Mode  →  ENTER

Use the up and down arrow keys to select an option, and then press ENTER.

- **Standard**: Selects the normal sound mode.
- **Music**: Emphasizes music over voices.
- **Movie**: Provides the best sound for movies.
- **Clear Voice**: Emphasizes voices over other sounds.
- **Amplify**: Increase the intensity of high-frequency sound to allow a better listening experience for the hearing impaired.

If **Speaker Select** is set to **External**, **Sound Mode** is disabled.

The displayed image may differ depending on the model.
5.2 Sound Effect

MENU \[\] → Sound → Sound Effect → ENTER [ ]

- If Speaker Select is set to External, Sound Effect is disabled.
- Available only when Sound Mode is set to Standard.

- SRS TruSurround HD (Off / On)
  This function provides a virtual 5.1 channel surround sound experience through a pair of speakers using HRTF(Head Related Transfer Function) technology.

- SRS TruDialog (Off / On)
  This function allows you to increase the intensity of a voice over background music or sound effects so that dialog can be heard more clearly.

- SRS CS Headphone (Off / On)
  You can hear virtual 5.1ch surround sound over the headphones.
  This function is available only when the headphones is connected.

- Equalizer
  The Equalizer displays a series of sliders. Use the up and down arrow keys to select a slider. Use the left and right arrow keys to change the slider’s value.
  - Balance L/R: Adjusts the balance between the right and left speaker.
  - 100Hz / 300Hz / 1kHz / 3kHz / 10kHz (Bandwidth Adjustment): Adjusts the level of specific bandwidth frequencies.
  - Reset: Resets the equalizer to its default settings.
5.3 3D Audio (ME75B model only)

5.3.1 3D Audio (Off / Low / Medium / High)

3D audio technology provides the immersive sound corresponding to the pop-up effect of 3D video by audio depth control in perspective.

- Available in only when watching 3D image.

5.4 Broadcast Audio Options

- Preferred Language
  (digital channels only)
  Use the up and down arrow keys to select a language, and then press [ ].
  Digital-TV broadcasts can simultaneously transmit many audio tracks (for example, simultaneous translations of the program into foreign languages).

  You can only select a language from among the ones being broadcasted.

- Auto Stereo
  (analog channels only)
  Automatically sets the sound to stereo or mono.
    - Manual / Auto

- Multi-Track Sound
  (analog channels only)
  Select an option using the up and down arrow keys, and then press [ ].
    - Mono: Choose for channels that are broadcasting in mono or if you are having difficulty receiving a stereo signal.
    - Stereo: Choose for channels that are broadcasting in stereo.

  Depending on the program being broadcast, you can listen to Mono, Stereo, or SAP.
5.5 Speaker Settings

- **Speaker Select (External / Internal)**
  If you are listening to the sound track of a broadcast or movie through an external receiver, you may hear a sound echo caused by the difference in decoding speed between the TV’s speakers and the speakers attached to your audio receiver. If this occurs, set the TV to **External**.

  - When you set **Speaker Select** to **External**, the TV’s speakers are turned off. You will hear sound through the external speakers only. When the **Speaker Select** is set to **Internal**, both the product speakers and the external speakers are on. You will hear sound through both.

  - If there is no video signal, both the TV’s speakers and the external speakers will be mute.

- **Auto Volume (Off / Normal / Night)**
  - **Normal** equalizes the volume level on each channel, so that when you change channels, the volume level is the same.
  - **Night** equalizes and decreases the volume level on each channel, so each channel is quieter. **Night** is useful at night, when you may want to keep the volume low.

  To use the volume control of a connected source device, set **Auto Volume** to **Off**. A change to the volume control of the connected source device may not be applied if **Auto Volume** is set to **Normal** or **Night**.

5.6 Reset Sound

Reset all sound settings to the factory defaults. Select **Reset Sound**, press [ ], select **Yes** in the pop-up, and then press [ ] again.
6.1 Favorites

MENU [III] → Media → Favorites → ENTER [□]

View all of your favorite channels.

The displayed image may differ depending on the model.

Your favorite channels are organized in up to five groups (Favorites 1 - 5). If you want to change from one favorite group to another, follow these steps.

- **View Mode** [ ]: Toggles between the Text view and Thumbnail view of your favorite channels. Thumbnail view displays a picture of the program currently on.
- **Antenna** [ ]: Toggles between Air and Cable.
- **Sorting** [ ]: Toggles between sorting favorites by Category and sorting by Title.
- **Edit Mode** [ ]: Delete channels from the Favorites list.
6.1.1 Using Edit Mode to Delete a Favorite

1. Select the Edit Mode on the upper right of your screen, and then press the [] button.
2. Press the \( \text{\text Less Than} / \text{\text Greater Than} / \text{\text Up} / \text{\text Down} \) buttons to select a channel, and then press [ ]. A check appears to the left of the channel.
   - You can select more than one channel.
   - Pressing [ ] again deselects the channel.
3. Select Delete at the bottom of your screen, and then press [ ]. A pop-up appears asking if you want to delete the item.
4. Select OK, press [ ], and then press [ ] again. The channel is deleted from Favorites.
5. Press [ ] again to exit Edit Mode.

6.2 Channel

Using the Channel function, you can add channels, delete Added channels, set Favorite channels, use the program guide for digital broadcasts and change between the All Channels and Added Ch. screen. You can also change the antenna or channel settings by selecting the icons in the top right corner of the screen.

6.2.1 Channel Manager

- Antenna: Toggle between Air or Cable. To access the Antenna function, use the arrow buttons to move the cursor to the Antenna icon on the top right corner of the screen.
- Edit Mode: Add channels to the Favorites list and delete channels from the Channel list.
- To change between All Channels and Added Ch., select All Channels or Added Ch. on the screen, and then press the [ ] button.
Using the TOOLS button with Channel

- **Edit Favorites**: You can register frequently watched channels to the Favorites.
- **Lock / Unlock**: You can lock some of the channels so that your children cannot watch inappropriate programs.
  
  When you set the Lock to On, you can use the Lock function.
- **Channel Name Edit** (Only for analog channels): You can rename a channel.
- **Add / Delete**: You can Add or Delete a selected channel.
  
  - You can view the channels deleted from the Added Ch. in the All Channels item.
  - The gray channels are deleted channels.
  - Add only appears if you have selected a deleted channel on the All Channels list.
  - Delete only appears if you have selected an added channel on the Added Ch. or All Channels list.

Channel Status Display Icons

<table>
<thead>
<tr>
<th>Icons</th>
<th>Operations</th>
</tr>
</thead>
<tbody>
<tr>
<td>📺</td>
<td>An analogue channel.</td>
</tr>
<tr>
<td>✓</td>
<td>A channel selected.</td>
</tr>
<tr>
<td>★</td>
<td>A channel set as a Favorite.</td>
</tr>
<tr>
<td>🗝</td>
<td>A locked channel.</td>
</tr>
</tbody>
</table>
6.2.2 Antenna

MENU [三位] → Media → Channel → Antenna → ENTER [确认]

Choose your preferred method of receiving digital broadcasts.

- Air / Cable

6.2.3 Auto Program

MENU [三位] → Media → Channel → Auto Program → ENTER [确认]

Scan all frequencies for broadcast signals and store channels found.

- The Auto Program operation takes about 6~7 minutes.
- The PIN input screen appears, Enter your 4 digit PIN number. The default PIN number of a new TV set is “0-0-0-0”.

How to Stop Auto Programming

1. Press the [确认] button.
2. A message will ask Stop Auto Program?
3. Select the Yes.

6.2.4 Fine Tune

MENU [三位] → Media → Channel → Fine Tune → ENTER [确认]

(analog channels only)

For analog channels, when the reception is bad, you can make the screen sharper.

- If you do not save the fine tuning data, and you move to another channel and then return to the channel that you have just fine-tuned, the channel will no longer be fine-tuned. For fine-tuned channels, the channel number is marked with <*>.
- To initialize a fine-tuned channel, select Reset in the Fine Tune window.
6.3 MagicInfo Lite

Press the MagicInfo Lite button on the remote control.

MagicInfo Lite Player allows you to play content (image, video, document files) at a desired time.
You can play content saved in internal memory or USB memory. You can also play content via MagicInfo Lite Server after connecting to a network.

For further details about how to use MagicInfo Lite Server, refer to 180 page the MagicInfo Lite Server user manual.

6.4 Videos

Connecting a USB Device
1 Turn on your product.
2 Connect a USB device containing photo, music and/or movie files to the USB port on the back or side panel of the product.
3 When a USB device is connected to the product, the Connected Device screen appears. Select a connected device, and then press [ ].

6.4.1 Playing a Video
1 Press the \[\] button to select the desired video in the file list.
2 Press the [ ] button or [ ](Play) button.

- The file name appears on the top with its playing time.
- If video time information is unknown, the playing time and progress bar are not displayed.
- During video playback, you can search using the and buttons.
- You can use the [REW], [FF], Pause, Stop, and Play buttons on the bottom of your remote during playback.
- Press the RETURN button to exit the movie
- Pressing the MENU button when content from a USB device is playing will stop the playback and return you to the previous input mode.

### Media

Video content will not play, or not play correctly, if there is an error in the content or the container.

Sound or video may not work if the contents have a standard bitrate/frame rate above the compatible Frame/sec listed in the table above.

If the Index Table is in error, the Seek (Jump) function is not supported.

You may experience file stuttering while playing a video through a network connection.

Video content can not be played, if there are many contents in one file.

When you play video over a network connection, the video may not be played smoothly.

The menu may take longer to appear if the video’s bit rate exceeds 10Mbps.

Some USB/digital camera devices may not be compatible with the player.

### Video Decoder

- Supports up to H.264, Level 4.1
- H.264 FMO / ASO / RS, VC1 SP / MP / AP L4 and AVCHD are not supported.
- For MPEG4 SP, ASP
  - Below 1280 x 720: 60 frame max
  - Above 1280 x 720: 30 frame max
- GMC 2 over is not supported.

### Audio Decoder

- Supports up to WMA 7, 8, 9, STD
- WMA 9 PRO does not support 2 channel excess multi channel or lossless audio.
- WMA sampling rate 22050Hz mono is not supported.
Using the Play Continuously Function (Resume Play)

If you exit a movie when it is playing, you can play the movie later from the point where you stopped it.

The Resume function does not support multiple users. (It will only memorize the point where the most recent user stopped playing.)

1. Select the movie file you stopped and want to resume by pressing the ◀ or ▶ button.
2. Press the [▶] (Play) or [◀] button.
3. Press Resume Icon on control panel for resume. The Movie will begin to play from where you stopped it.

Resume is only available when you resume playing a movie you had stopped.
6.5 Photos

Connecting a USB Device
1. Turn on your product.
2. Connect a USB device containing photo, music and/or movie files to the USB port on the back or side panel of the product.
3. When a USB device is connected to the product, the Connected Device screen appears. Select a connected device, and then press [ ].

6.5.1 Viewing a Photo (or Slide Show)
1. Press the \(/\) button to select the desired file in the file list.
2. Press the [ ] button.
   - To view files manually, one at a time, press the left or right arrow buttons.
   - To start the slide show, press the [ ] (Play) button when the file you selected is displayed.
   - During the slide show, all files in the file list are displayed in order, starting from the file you selected.
   - You can add background music to a slide show if you have music files on your USB device or PC by setting Background Music On to On in the Tools menu, and then selecting music files to play.
   - The Background Music Setting cannot be changed until the BGM has finished loading.
   - Pressing the MENU button when content from a USB device is playing will stop the playback and return you to the previous input mode.
6.6 Music

Connecting a USB Device

1. Turn on your product.
2. Connect a USB device containing photo, music and/or movie files to the USB port on the back or side panel of the product.
3. When a USB device is connected to the product, the **Connected Device** screen appears. Select a connected device, and then press [ ].

### 6.6.1 Playing Music

1. Press the [ ] button to select the desired music file in the file list.
2. Press the [ ] button or [ ] (Play) button.
   - When the music is playing, you can search using the [ ] (REW) and [ ] (FF) button.
   - If the sound is abnormal when you play MP3 files, adjust the Equalizer in the Sound menu. (An over-modulated MP3 file may cause a sound problem.)
   - Pressing the **MENU** button when content from a USB device is playing will stop the playback and return you to the previous input mode.

Creating My Playlist

1. On the **Music** screen, press the [ ] button to select **Edit Mode**, and then press the [ ] button.
   - A check box appears to the left of the files.
2. Press the [ ] button to select the tracks you want to add, and then press the [ ] button.
   - A check appears in the check box.
3. Repeat Step 2 to select additional tracks.
   - To select all the files in the current page, select **Select All** at the top of the page, and then press [ ].
4. Press the [ ] button to select **Add to My Playlist**.
   - Note that selecting **Clear My Playlist** will return **My Playlist** to the default playlist and remove all the tracks you added.
5. Press the [ ] button. The message “**Selected items were added to My Playlist.**” is displayed.
6. The newly created or updated playlist will be in the main **Music** page.
Playing My Playlist

Select the My Playlist folder and it will play automatically. Press the ▲ or ▼ button to play a different music file within the play list.

To delete a file from My Playlist, select the recycle bin icon next to the file you want to delete by using the direction buttons, and then press [□]. The file will be deleted from My Playlist.

Playing Selected Music Files

1 On the Music screen, press the ◀/▶/▲/▼ button to select Edit Mode on the far right side of the screen, and then press the [□] button.

2 Press the ◀/▶/▲/▼ button to select the desired music file in the file list, and then [□] button.

   • The ✔ mark appears to the left of the selected files.
   • To select all the files in the current page, select Select All at the top.
   • To cancel a selection, press the [□] button again.

3 Press the ◀/▶/▲/▼ button to select Play at the bottom of the screen, and then press [□]. The selected music files play.
## 6.7 Videos / Photos / Music - Additional Functions

### 6.7.1 Sorting the file lists

To sort files in the file lists, select the **(Sorting)** icon in the top right of the screen by using the `#/` button. Then, press the `[` button. The checks below indicate which media the sort criteria apply to.

<table>
<thead>
<tr>
<th>Sort Criteria</th>
<th>Operation</th>
<th>Videos</th>

</table>

- Pressing the **INFO** button while a device name is selected will display information about the selected device.
- Pressing the **INFO** button while a file is selected will display information about the selected file.
6.8 Source

Source allows you to select a variety of sources and change source device names.

6.8.1 Source

You can display the screen of a source device connected to the product. Select a source from Source List to display the screen of the selected source.

The input source can also be changed by using the SOURCE button on the remote control.

The screen may not display correctly if an incorrect source is selected for the source device you want to convert to.
6.8.2 Edit Name

MENU [ MEDIA ] → Media → Source → TOOLS → Edit Name → ENTER [ ENTER ]

You can rename a connected source device.

- Sometimes the screen will not display properly unless the name of a source device is specified in Edit Name. In addition, it is best to rename the source device in Edit Name to obtain optimal picture quality.

The list can include the following source devices. Source devices on the list differ depending on the selected source.

- VCR / DVD / Cable STB / Satellite STB / PVR STB / AV Receiver / Game / Camcorder / PC / DVI PC / DVI Devices / TV / IPTV / Blu-ray / HD DVD / DMA

Available settings in the Picture menu depend on the current source and settings made in Edit Name.

- When connecting a PC to the HDMI IN port with HDMI cable, you should set the TV to PC mode under Edit Name.
- When connecting a PC to the HDMI IN port with HDMI to DVI cable, you should set the TV to DVI PC mode under Edit Name.
- When connecting an AV devices to the HDMI IN port with HDMI to DVI cable, you should set the TV to DVI Devices mode under Edit Name.

6.8.3 Edit Favorites

MENU [ MEDIA ] → Media → Source → TOOLS → Edit Favorites → ENTER [ ENTER ]

In the Source, press the TOOLS button to select Edit Favorites. You can set an external input source to Favorites.

6.8.4 Information

MENU [ MEDIA ] → Media → Source → TOOLS → Information → ENTER [ ENTER ]

You can see detailed information about the selected external device.

6.8.5 Refresh

MENU [ MEDIA ] → Media → Source → TOOLS → Refresh → ENTER [ ENTER ]

In the Source, if the external devices are not displayed, press the TOOLS button to select Refresh. Search for connected devices.
7 Network

7.1 Network Setting

7.1.1 Connecting to a Wired Network

There are three ways to attach your product to your LAN using cable.

- You can attach your product to your LAN by connecting the LAN port on the back of your product to an external modem using a LAN cable. See the diagram below.

- You can attach your product to your LAN by connecting the LAN port on the back of your product to an IP Sharer which is connected to an external modem. Use LAN cable for the connection. See the diagram below.

- Depending on how your network is configured, you may be able to attach your product to your LAN by connecting the LAN port on the back of your product directly to a network wall outlet using a LAN cable. See the diagram below. Note that the wall outlet is attached to a modem or router elsewhere in your house.

- If you have a Dynamic Network, you should use an ADSL modem or router that supports the Dynamic Host Configuration Protocol (DHCP). Modems and routers that support DHCP automatically provide the IP address, subnet mask, gateway, and DNS values your product needs to
access the Internet so you do not have to enter them manually. Most home networks are Dynamic Networks.

Some networks require a Static IP address. If your network requires a Static IP address, you must enter the IP address, subnet mask, gateway, and DNS values manually on your product Cable Setup Screen when you set up the network connection. To get the IP address, subnet mask, gateway, and DNS values, contact your Internet Service Provider (ISP). If you have a Windows computer, you can also get these values through your computer.

You can use ADSL modems that support DHCP if your network requires a Static IP address. ADSL modems that support DHCP also let you use Static IP addresses.

### 7.1.2 Wired Network Settings

Press MENU [III] → Network → Network Settings → ENTER [Enter]

Set the network connection to use Internet services such as perform software upgrades.

The displayed image may differ depending on the model.
Network

Automatic Network Settings

Use the Automatic Network Settings when connecting your product to a network that supports DHCP. To set up your product cable network connection automatically, follow these steps.

How to set up automatically

1. Go to the Network Settings screen.
2. Select Wired, press [ ], and then press [ ] again.
3. The network test screen appears and verifies the network connection. When the connection has been verified, the “Internet is connected successfully.” message appears.

   - If the connection process fails, check the LAN port connection.
   - If the automatic process cannot find the network connection values or if you want to set the connection manually, go to the next section, Manual Network Setup.

Manual Network Settings

Use the Manual Network Settings when connecting your product to a network that requires a Static IP address.

Getting the Network Connection Values

To view the Network connection values on most Windows computers, follow these steps.

1. Right click the Network icon on the bottom right of the screen.
2. In the pop-up menu that appears, click Status.
3. On the dialog that appears, click the Support tab.
4. On the Support Tab, click the Details button. The Network connection values are displayed.

How to set up manually

To set up your product cable network connection manually, follow these steps.

1. Go to the Network Settings screen.
2. Select Wired, press [ ], and then press [ ] again. The network test screen appears and the verification process starts.
4. Select the field at the top, press [ ], and then set IP Mode to Manual.
5. Press the ▼ button on your remote to go to the IP Address entry field, and then press [ ].
6. Enter the first portion of the IP Address (for example, 105) into the first entry field using the number keys on your remote. Press the right arrow button to go to the next field.
7. Enter the next portion of the IP Address. Press the right arrow button to go to the next field.
8. Repeat the entry process for each field in the IP Address.
If you make a mistake when entering a number, re-enter the number to correct it. You can also press the up or down arrow button to change the number one unit at a time.

9 When done entering the **IP Address**, press [ ].

10 Press the down arrow key to go to the **Subnet Mask** fields, and then press [ ].

11 Repeat the same entry process for **Subnet Mask**, **Gateway**, and **DNS Server**.

12 When done, select **OK** at the bottom of the page, and then press [ ]. The network test screen appears and the verification process starts. When the connection has been verified, the “Internet is connected successfully.” message appears.
7.1.3 Connecting to a Wireless Network

To connect your product to your network wirelessly, you need a wireless router or modem and a Samsung Wireless LAN adapter (WIS10ABGN, WIS12ABGNX), which you connect to your product back or side panel USB port. See the illustration below.

Samsung’s Wireless LAN adapter is sold separately and is offered by selected retailers, Ecommerce sites, and Samsungparts.com. Samsung’s Wireless LAN adapter supports the IEEE 802.11a/b/g and n communication protocols. Samsung recommends using IEEE 802.11n. When you play video over a network connection, the video may not play smoothly.

- You must use the “Samsung Wireless LAN adapter” (WIS10ABGN, WIS12ABGNX) to use a wireless network.
- The Samsung Wireless LAN Adapter and the USB extension Cable are sold separately and are offered by select retailers, Ecommerce sites, and Samsungparts.com.
- To use a wireless network, your product must be connected to a wireless IP sharer (either a router or a modem). If the wireless IP sharer supports DHCP, your product can use a DHCP or static IP address to connect to the wireless network.
- Select a channel for the wireless IP sharer that is not currently being used. If the channel set for the wireless IP sharer is currently being used by another device nearby, this will result in interference and communication failure.
- Your product supports only the following wireless network security protocols.
  - Authentication Mode: WEP, WPAPSK, WPA2PSK
  - Encryption Type: WEP, TKIP, AES.
- If you select the Pure High-throughput (Greenfield) 802.11n mode and the Encryption type is set to WEP, TKIP or TKIP AES (WPS2Mixed) on your AP or wireless router, Samsung TVs will not support a connection in compliance with new Wi-Fi certification specifications.
- If your wireless router supports WPS (Wi-Fi Protected Setup), you can connect to the network via PBC (Push Button Configuration) or PIN (Personal Identification Number). WPS will automatically configure the SSID and WPA key in either mode.
- If your router, modem, or device is not certified, it may not connect to the product via the “Samsung Wireless LAN adapter.”
- Ensure the product is turned on before you connect the Samsung Wireless LAN adapter.
- Connection Methods: You can setup the wireless network connection in five ways.
  - Auto Setup (Using the Auto Network Search function)
  - Manual Setup
  - Ad Hoc
Network

- WPS (PBC)
- One Foot Connection

- The product may not recognize the Samsung Wireless LAN adapter if you connect it to the product with a USB hub or USB extension cable other than the cable supplied with the product.

7.1.4 Wireless Network Setting

Automatic Network Setup

Most wireless networks have an optional security system that requires devices that access the network to transmit an encrypted security code called an Access or Security Key. The Security Key is based on a Pass Phrase, typically a word or a series of letters and numbers of a specified length you were asked to enter when you set up security for your wireless network. If you use this method of setting up the network connection, and have a Security Key for your wireless network, you will have to enter the Pass Phrase during the automatic or manual setup process.

How to set up automatically

1. Go to the Network Settings screen.
2. Select Wireless (General), press [ ], and then press [ ] again.
3. The Network function searches for available wireless networks. When done, it displays a list of the available networks.
4. In the list of networks, press the or button to select a network, and then press the [ ] button twice.

   If the wireless router is set to Hidden (Invisible), you have to select Add Network and enter the correct Network Name (SSID) and Security key to establish the connection.

5. If the Enter security key screen appears, go to step 6. If you select a wireless router that does not have security, go to step 8.
6. If the router has security, enter the Security key (Security key or PIN).

   - When you enter the Security key (Security key or PIN), use [ ] / [ ] / [ ] / [ ] buttons on your remote to select number/characters. Press the [ ] button to enter the characters.
   - You can also enter numbers by pressing the number buttons on your remote.

7. When done, use the right arrow button to move the cursor to Next, and then press [ ].
8. The network connection screen appears and the verification process starts. When the connection has been verified, the “Internet is connected successfully.” message appears.

   - If the network does not accept the Security key (Security key or PIN), select Retry or select IP Settings to enter the settings manually.
   - If you want to set up the connection manually, select IP Settings. Then, go to the next section, “How to set up manually”.

z The product may not recognize the Samsung Wireless LAN adapter if you connect it to the product with a USB hub or USB extension cable other than the cable supplied with the product.
Manual Network Setup

Use the Manual Network Settings when connecting your product to a network that requires a Static IP address or if the automatic connection process has failed.

Getting the Network Connection Values

To view the Network connection values on most Windows computers, follow these steps.

1. Right click the Network icon on the bottom right of the screen.
2. In the pop-up menu that appears, click Status.
3. On the dialog that appears, click the Support tab.
4. On the Support Tab, click the Details button. The Network connection values are displayed.

How to set up manually

To set up your product cable network connection manually, follow these steps.

1. Go to the Network Settings screen.
2. Select Wireless (General), press [ ], and then press [ ] again.
3. The Network function searches for available wireless networks. When done, it displays a list of the available networks.
4. In the list of networks, press the ▲ or ▼ button to select a network, and then press the [ ] button twice.
   - If the wireless router is set to Hidden (Invisible), you have to select Add Network and enter the correct Network Name (SSID) and Security key to establish the connection.
5. If the Enter security key screen appears, go to step 6. If you selected an wireless router that does not have security, go to step 8.
6. Enter the Security key (Security key or PIN).
   - When you enter the Security key (Security key or PIN), use the ◄/▶/▲/▼ buttons on your remote to select number/characters. Press [ ] to enter the characters.
   - You can also enter numbers by pressing the number buttons on your remote.
   - You should be able to find the Pass Phrase on one of the set up screens you used to set up your router or modem.
7. When done, use the ▶ button to move the cursor to Next, and then press the [ ] button.
8. The network connection screen appears and the verification process starts. Press [ ] to cancel. Select IP Settings on the network connection screen. The IP Settings screen appears.
9. Select the field on the top, press [ ], and then set IP Mode to Manual.
10. Press the ▼ button on your remote to go to the IP Address entry field, and then press [ ].
11. Enter the first portion of the IP Address (for example, 105) into the first entry field using the number keys on your remote. Press the ▶ button to go to the next field.
12. Enter the next portion of the IP Address. Press the ▶ button to go to the next field.
Repeat the entry process for each field in the **IP Address**.

- If you make a mistake when entering a number, re-enter the number to correct it. You can also press the ▲ or ▼ button to change the number one unit at a time.

When done entering the **IP Address**, press [ ].

Press the ▼ button to go to the **Subnet Mask** fields, and then press [ ]. Repeat the same entry process for **Subnet Mask**, **Gateway**, and **DNS Server**.

When done, select **OK** at the bottom of the page, and then press [ ]. The network connection screen appears and the verification process starts. When the connection has been verified, the “Internet is connected successfully.” message appears.

### 7.1.5 WPS(PBC)

**How to set up using WPS(PBC)**

If your router has a **WPS(PBC)** button, follow these steps.

1. Go to **Network Setting** screen.
2. Select **WPS(PBC)**, press [ ], and then press [ ] again.
3. Press the **WPS(PBC)** button on your router within 2 minutes. Your product automatically acquires all the network setting values it needs and connects to your network.
4. The network connection screen appears, and network setup is done.
7.1.6 One Foot Connection

The **One Foot Connection** function lets you connect your Samsung product automatically to a Samsung wireless routers. If your wireless router does not support **One Foot Connection**, you must connect using one of the other methods.

You can check for equipment that supports **One Foot Connection** on www.samsung.com.

**How to set up using One Foot Connection**

1. Turn on the Samsung wireless router and the product.
2. Go to Network Settings screen.
3. Select **One Foot Connection**, and press 
   then press 
   again.
4. Place the wireless router in parallel with and no farther away than 25cm (of Samsung Wireless Adapter).

   If **One Foot Connection** does not connect your product to your Router, a pop-up screen appears on the screen notifying you of the failure. If you want to try using **One Foot Connection** again, reset the wireless router, and then try again from Step 1. You can also choose one of the other connection setup methods.

5. The network connection screen appears, and network setup is done.
6. Place the wireless router in a desired location.

   If the wireless router’s settings change or you install a new wireless router, you must perform the **One Foot Connection** procedure again, beginning from Step 1.

**Priority QOS**

This Priority QOS function is unique to Samsung wireless routers.

You can connect a Samsung wireless router to many devices, such as laptops, mobile phones, BD players etc. But, when you connect a Samsung product to a Samsung wireless router, the Samsung wireless router gives the Samsung product a priority connection.

This ensures you get the highest quality streaming contents and the fastest throughput speed.

- Priority QOS makes your product faster by giving it priority bandwidth. (Priority QOS is optional. You can turn it on and off.)
- Because your Samsung product has a priority connection, you can enjoy HD content without buffering.

   The connection speed may vary based on the network environment.
7.1.7 Ad Hoc Network Setup

You can connect to a mobile device supporting Ad-hoc connections without a wireless router or AP through the product.

**How to set up using Ad hoc**

1. Go to **Network Settings** screen.
2. Select **Wireless (General)**, and press [ unanimously ], then press [ unanimously ] again.
3. Select **Ad hoc**. The message “Ad hoc service supports a direct connection with Wi-Fi compatible devices like a cell phone or PC. Other network services may be limited. Do you want to change the network connection?” is displayed.
4. Select **OK**., and press [ unanimously ]. The product searches for the mobile device.
5. When the product finishes searching for your mobile device, input the generated **Network Name (SSID)** and **Security Key** into the device you want to connect and then connect to the network.

   - If network does not operate normally, check the **Network Name (SSID)** and **Security key** again. An incorrect **Security key** may cause a malfunction.
   - If a device is connected once, it is displayed in the Network Setting list. When you connect to it again, you can find it in the list.

7.2 Network Status

![Network Status Menu](image)

You can check the current network and Internet status.

The displayed image may differ depending on the model.
7.3 MagicInfo Lite Settings

MENU [MENU] → Network → MagicInfo Lite Settings → ENTER [ENTER]

1 Server
   • Setting the MagicInfo Lite Server IP
     □ Enter the server IP address and port number. Use 7001 as the port number.

     If unable to connect to the server using port number 7001, check with your server administrator to find the correct port number and then change the port number.

   • FTP Mode
     □ Select an FTP operating mode: Active or Passive.

   • Default Storage
     □ Specify the default memory to save schedules or content sent from the server to.
     □ If the default storage space is set to USB, a schedule will not run if a USB device is not connected.
     □ Send a notification message to the server when internal memory is used up.

2 Storage
   • Internal Memory: Displays the space currently being used or deletes all content
   • USB: Displays the space currently being used

3 Slideshow
   • Image Viewer Time: Sets the time length you want to display images played from Local Schedule or by one of the auto playback functions
   • PPT Viewer Time: Sets the time length you want to display each page of a document file played from Local Schedule or by one of the auto playback functions
   • Image Effect: Configures the image transition effects.
     □ Fade1, Fade2, Blind, Spiral, Checker, Linear, Stairs, Wipe, Random, None

4 Schedule Name
   • Select a schedule title format when creating a local schedule.
     □ YYYYMMDD, YYYYDDMM, DDMYYYY

5 Safely Remove USB
   • Safely removes USB memory

6 Information
   • Device Name: Displays the name of a device recognized by the server
   • Serial Number: Displays the original identification number of a device
   • Software Version: Displays the software version of a device

Refer to 129 page for details about the MagicInfo Lite Player Guide menu.
8.1 Plug & Play

When the product is initially powered on, a sequence of on-screen prompts will assist in configuring basic settings. Press the [ ] button. **Plug & Play** is available only when the Input **Source** is set to **TV**.

1. **Selecting a language**
   Press the ↑ or ↓ button, then press the [ ] button. Select the desired OSD (On Screen Display) language.

2. **Setting up the Network**
   Set up your network connection. Press the [ ] button to start. If you do not know your network setup information or want to set it later, select **Skip**. You can set up the network connection later using the **Network** menu.

3. **Setting the Clock Mode**
   Set the **Clock Mode** automatically or manually.
   - **Auto**: Allows you to select DST (Daylight Savings Time).
   - **Manual**: Allows you to manually set the current date and time.

4. **Selecting search options for auto program**
   Press the ↑ or ↓ button, then press the [ ] button. Select the channel source to memorize.

5. The basic settings are completed.
   Press the [ ] button.
8.2 Multi Control

MENU  【Ⅲ】 → System  → Multi Control  → ENTER  【－】

Assign an individual ID to your product.

8.2.1 Configuring settings for Multi Control

- **MDC Connection**  
  Select a method to connect to MDC to receive the MDC signal.
  - **RS232C MDC**  
    Communicate with MDC via the RS232C-stereo cable.
  - **RJ45 MDC**  
    Communicate with MDC via the RJ45 cable.

- **ID Setup**  
  Assign an ID to a set. (Range: 0~99)
  Press  ▲  or  ▼  to select a number, and press  【－】.

- **ID Input**  
  Enter the ID number of the product connected to the input cable for input signal reception.
  Enter the number you want using the number buttons on the remote control.

Refer to page 71 for details about the MDC menu.
8.3 Time

You can configure Clock Set or Sleep Timer. You can also set the product to automatically turn on or off at a specified time using the Timer function.

8.3.1 Clock

Set the clock to use the various timer features of the product.

Changing the Setting for Clock

- **Clock Mode**
  Set the current time manually or automatically.
  - **Auto**: Have the product set the current time automatically using the time from a digital channel.
  
  ![You must have the cable or an antenna connected to the product to set the time automatically.](image)
  
  - **Manual**: Set the current time manually.

- **Clock Set**
  Set the **Date** and **Time**.

  ![Available only when Clock Mode is set to Manual.](image)

  - You can set the **Date** and **Time** directly by pressing the number buttons on the remote control.

8.3.2 Sleep Timer

Automatically shuts off the product after a preset period of time.

(Off, 30 min, 60 min, 90 min, 120 min, 150 min and 180 min)

![Use the up and down arrows to select a period of time, and then press [ ]. To cancel Sleep Timer, select Off.](image)
8.3.3 On Timer

Set On Timer so that your product turns on automatically at a time and on a day of your choosing.

- **On Timer**: You can set up three separate On Timer configurations. (On Timer 1, On Timer 2, On Timer 3)
  
  You must set the clock before you can use On Timer.

  - **Setup**: Select Off, Once, Everyday, Mon~Fri, Mon~Sat, Sat~Sun or Manual. If you select Manual, you can choose the days you want On Timer to turn on your product.
    - The check mark indicates days you’ve selected.
  
  - **Time**: Set the hour and minute. Use the number buttons or the up and down arrow keys to enter numbers. Use the left and right arrow buttons to change entry fields.
  
  - **Volume**: Set the desired volume level. Use the left and right arrow buttons to change the volume level.
  
  - **Source**: Select the input source of your choice.
  
  - **Antenna** (when the Source is set to TV): Select Air or Cable.
  
  - **Channel** (when the Source is set to TV): Select the desired channel.
  
  - **Music / Photo** (when the Source is set to USB): Select a folder in the USB device containing music or photo files you want played when the product turns on automatically.
    - If there is no music file on the USB device or you don’t select a folder containing a music file, the Timer function does not operate correctly.
    - If there is only one photo file in the USB, the Slide Show will not play.
    - If a folder name is too long, the folder cannot be selected. Each USB you use is assigned its own folder. When using more than one of the same type of USB, make sure the folders assigned to each USB have different names.
    - We recommend that you use a USB memory stick and a multi card reader when using On Timer. The On Timer function may not work with USB devices with a built-in battery, MP3 players, or PMPs made by some manufacturers because the product can take too long to recognize these devices.
8.3.4 Off Timer

You can set up three separate Off Timer configurations. (Off Timer 1, Off Timer 2, Off Timer 3)

You must set the clock before you can use Off Timer.

- **Setup**: Select Off, Once, Everyday, Mon~Fri, Mon~Sat, Sat~Sun or Manual. If you select Manual, you can choose the days you want Off Timer to turn off your product.
- **Time**: Set the hour and minute. Use the number buttons or the up and down arrow keys to enter numbers. Use the left and right arrow buttons to change entry fields.

8.3.5 Holiday Management

Timer will be disabled during a period specified as a holiday.

Setting Holiday Management

- **Add**: Specify the period you want to add as a holiday.
  - Select the start and end dates of the holiday you want to add using the ▲/▼ buttons, and click the Save button.
  - The period will be added to the list of holidays.
    - **Start**: Set the start date of the holiday.
    - **End**: Set the end date of the holiday.
    - **Delete**: Delete all items from the list of holidays.
      Select Delete. The message "Delete all holidays?" will appear.
      Select Yes. All holidays will be deleted.
- **Apply**: Set the On Timer and Off Timer to not activate on public holidays.
  - Press [ ] to select the On Timer and Off Timer settings you do not want to activate.
  - The selected On Timer and Off Timer will not activate.
8.4 Menu Language

MENU (H) → System → Menu Language → ENTER [△]

Set the menu language.

1. Select Menu Language and press the [△] button.
2. Choose desired language and press the [△] button.

Choose between 한국어 and English.

8.5 Eco Solution

MENU (H) → System → Eco Solution → ENTER [△]

The displayed image may differ depending on the model.

8.5.1 Energy Saving

Save power with the Energy Saving feature.

While Energy Saving mode is active, the product power consumption will be controlled to save power.

- Off / Low / Medium / High / Picture Off
8.5.2  Eco Sensor (Off / On)

To enhance your power savings, the picture settings will automatically adapt to the light in the room.

- If you adjust **Backlight** in the **Picture** menu, **Eco Sensor** will be set to **Off**.

- **Min. Backlight**: When **Eco sensor** is **On**, you can manually adjust the minimum screen brightness.
  - If **Eco Sensor** is **On**, the display brightness may change (become slightly darker or brighter) depending on the surrounding light intensity. You can control the screen’s minimum brightness with the **Min. Backlight** function.

8.5.3  No Signal Power Off

To avoid unnecessary energy consumption, you can set how long you want the product to remain on if it’s not receiving a signal.

- **Off / 15 min. / 30 min. / 60 min.**
  - Disabled when an attached PC is in power saving mode.
  - The default setting is 15 min. for this product.
  - The product will automatically power off at a specified time. The time can be changed as required.

8.5.4  Auto Power Off (Off / On)

The product will automatically turn off if you don’t press a button on the remote or touch a button on product front panel within 4 hours to prevent overheating.
8.6 Caption

MENU [ ] → System → Caption → ENTER [ ]

(On-Screen Text Messages)

8.6.1 Caption

You can switch the caption function on or off. If captions are not available, they will not be displayed on the screen.

- Off / On

The Caption feature does not work with devices connected to the product through the Component, HDMI or PC input jacks.

8.6.2 Caption Mode

You can select the desired caption mode.

The availability of captions depends on the program being Broadcasted.

- Default / English / Korean: (analog channels only) The Analog Caption function operates in either analog product channel mode or when a signal is supplied from an external device to the product. (Depending on the broadcasting signal, the Analog Caption function may or may not work with digital channels.)

- Default / Service1~Service6: (digital channels only) The Digital Captions function works with digital channels.
8.6.3 Digital Caption Options

(digital channels only) Adjusts the each option. When done, select Close.

- **Size**: Options include Default, Small, Standard and Large. The default is Standard.
- **Foreground Color**: You can change the color of the letters. Options include Default, White, Black, Red, Green, Blue, Yellow, Magenta and Cyan. The default is White.
- **Background Color**: You can change the background color of the caption. Options include Default, White, Black, Red, Green, Blue, Yellow, Magenta and Cyan. The default is Black.
- **Font Opacity**: This adjusts the opacity of text. Options include Default, Transparent, Translucent, Solid and Flashing.
- **Background Opacity**: This adjusts the opacity of the caption background. Options include Default, Transparent, Translucent, Solid and Flashing.

- The availability of captions depends on the program being Broadcasted.
- The Default setting follows the standards set by the broadcaster.
- You cannot set the Foreground Color and Background Color to the same color.
8.7 Security

Every time you access the Security functions, the PIN screen will appear and the default PIN number is "0-0-0-0". The PIN screen closes and the Security menu appears.

The displayed image may differ depending on the model.

8.7.1 Safety Lock (Off / On)

It sets safe lock function.

All the menus and buttons of the product and remote control, except for the LOCK button on the remote control, will be locked by the Safety Lock function. To unlock the menus and buttons, press the LOCK button and then enter the password (default password: 0 - 0 - 0 - 0).

8.7.2 Button Lock (Off / On)

This menu can be used to lock the buttons on the product. Only the remote control can control the product if Button Lock is set to On.
8.7.3 Channel Lock (Off / On)

Lock channels in channel manager, to prevent unauthorized users, such as children, from watching unsuitable programme.

- Available only when the input Source is set to TV.
- The default PIN number of a new TV set is “0-0-0-0”.

- If you forget the PIN, press the remote-control buttons in the following sequence, which resets the pin to “0-0-0-0:”
  
  POWER (off) → MUTE → 8 → 2 → 4 → POWER (on)

8.7.4 Change PIN

The Change PIN screen will appear. Choose any 4 digits for your PIN and enter it in Enter New PIN. Re-enter the same 4 digits in Confirm New PIN. When the Confirm screen disappears, press the Close button. The product has memorized your new PIN.
8.8 PIP

For PIP sound, refer to the Sound Select instructions.

If you turn the product off while watching in the PIP mode, the PIP function is reset to off. When you turn your product on, you must turn PIP on again to watch in the PIP mode.

You may notice that the picture in the PIP screen becomes slightly unnatural when you use the main screen to view a game or karaoke.

PIP Settings

The picture from the external video source will be in the main screen and the picture from the product tuner will be in the PIP sub-picture screen.

<table>
<thead>
<tr>
<th>Main picture</th>

</table>

- **PIP (Off / On):** Activate or deactivate the PIP function.
- **Source** (depending on the input source): You can select a source of the sub-picture.
- **Air/Cable (Air / Cable):** Select either Air or Cable as the input source for the sub-screen.
  - This option is enabled if the secondary display is set to TV.
- **Channel:** Select the channel for the sub-screen.
  - This option is enabled if the secondary display is set to TV.
- **Size (, , , , ,):** Select a size for the sub-picture.
- **Position (, , , ,):** Select a position for the sub-picture.
  - In Double (, , ) mode, you cannot select Position.
- **Sound Select (Main / Sub):** You can choose to listen to the sound from the Main picture or the Sub picture.
8.9 Auto Protection Time

MENU [ ] System → Auto Protection Time → ENTER [ ]

If the screen displays a still image for a certain period of time you define, the product activates the screen saver to prevent the formation of burnt in ghost images on the screen.

- Off / 2 hours / 4 hours / 8 hours / 10 hours

8.10 Screen Burn Protection

MENU [ ] System → Screen Burn Protection → ENTER [ ]

To reduce the possibility of screen burn, this unit is equipped with Pixel Shift screen burn prevention technology. Pixel Shift moves the picture slightly on the screen. The Pixel Shift Time setting allows you to program the time between movements of the picture in minutes.

The displayed image may differ depending on the model.
8.10.1  Pixel Shift

Configure Pixel Shift to prevent screen damage.

Available Pixel Shift Settings and Optimum Settings

<table>
<thead>
<tr>
<th></th>
<th>Available Settings</th>

<td>1~4 min.</td>
<td>4 min.</td>
</tr>
</tbody>
</table>

- The Pixel Shift value may differ depending on the product size and mode.
- This function is not available in the Screen Fit mode.
- **Horizontal**: Sets how many pixels the screen moves horizontally.
- **Vertical**: Sets how many pixels the screen moves vertically.
- **Time**: Set the time interval for performing the horizontal or vertical movement, respectively.

8.10.2  Timer

You can set the timer for Screen Burn Protection.

- **Off / Repeat / Interval**

If you start the operation to erase any residual image, the operation will be performed for the set period of time and then automatically finish.

- **Mode**: You can change the Safety Screen Type.
  - **Pixel / Rolling Bar / Fading Screen**
- **Period**: Use this function to set the execution period for each mode set in the timer.
  - **Hour**: 1 ~ 10
- **Time**: Within the set period of time specify a time for execution.
  - **Sec**: 10 ~ 50
- **Start Time**: Set start time to display screen saver.
- **End Time**: Set end time to display screen saver.

8.10.3  Immediate Display

Select the screen saver you want to display immediately.

- **Off / Pixel / Rolling Bar / Fading Screen**
8.10.4 Side Gray

Select the brightness of the grey for the screen background.

-  Off / Light / Dark

8.11 Video Wall

MENU [ ] → System → Video Wall → ENTER [ ]

Customize the layout of multiple displays that are connected to form a video wall. In addition, display part of a whole picture or repeat the same picture on each of the connected multiple displays. To display multiple images, refer to MDC Help or the MagicInfo user guide. Some models may not support the MagicInfo function.

- If more than four displays are connected horizontally and vertically, it is recommended that you use an input resolution of XGA (1024 x 768) level or higher to prevent a dark picture due to degradation in the contrast or color intensity.
- To play 3D content when Video Wall is set to On, a multi HD player (MHP) is required.

8.11.1 Video Wall

You can activate or deactivate Video Wall. To organize a video wall, select On.

The displayed image may differ depending on the model.
8.11.2 Format

Select a format to display images on multiple displays.

- **Full**: Display images in full screen.
- **Natural**: Display images at the original resolution without enlarging or reducing.

The **Format** option is only enabled when **Video Wall** is set to **On**.

8.11.3 Horizontal

This function automatically divides the screen according to the specified number of horizontal displays. Enter the number of horizontally arranged displays. The horizontal screen will automatically be divided according to the number entered. A maximum of 15 displays can be assigned to the horizontal arrangement.

- The screen can be divided into a maximum of 100 screens (horizontal and vertical screens multiplied). For example, if the horizontal arrangement is set to 15, a maximum of 6 displays can be assigned to the vertical arrangement. Conversely, if the vertical arrangement is set to 15, a maximum of 6 displays can be assigned to the horizontal arrangement.
- The **Horizontal** option is only enabled when **Video Wall** is set to **On**.

8.11.4 Vertical

This function automatically divides the screen according to the specified number of vertical displays. Enter the number of vertically arranged displays. The vertical screen will automatically be divided according to the number entered. A maximum of 15 displays can be assigned to the vertical arrangement.

- The screen can be divided into a maximum of 100 screens (horizontal and vertical screens multiplied). For example, if the horizontal arrangement is set to 15, a maximum of 6 displays can be assigned to the vertical arrangement. Conversely, if the vertical arrangement is set to 15, a maximum of 6 displays can be assigned to the horizontal arrangement.
- The **Vertical** option is only enabled when **Video Wall** is set to **On**.
8.11.5 Screen Position

You can customize the arrangement of split screens by moving displays identified with a number using the Screen Position function.

Select Screen Position to display the arrangement of displays (identified with a number) specified according to the Horizontal or Vertical settings. To customize the arrangement, move a number (display) using the direction buttons on the remote control and press [→].

- A maximum of 100 displays can be arranged in Screen Position.
- The Screen Position option is only enabled when Video Wall is set to On.
- The Screen Position window is only displayed when Horizontal and Vertical are configured.
8.12 Source AutoSwitch Settings

Turning on the display with Source AutoSwitch On, and the previous video source selection is not active, the display will automatically search the different video input sources for active video.

- **Source AutoSwitch**
  When the Source AutoSwitch is On, the display video source will automatically be searched for active video.
  
  The Primary Source selection will be activated, if the current video source is not recognized. Secondary Source selection will become active, if no primary video source is available.
  
  If both the primary and secondary input sources are not recognized, the display will perform two searches for an active source, each search checking the primary and then secondary source. If both searches fail, the display will return to the first video source and display a message indicating that there is no signal.
  
  When the Primary Source selection is set to All, the display will search all the video source inputs twice in sequence looking for an active video source, returning back to the first video source in the sequence if no video is found.

![Source AutoSwitch Settings]

The displayed image may differ depending on the model.

- **Primary Source**
  Specify Primary Source for the automatic input source.

- **Secondary Source**
  Specify Secondary Source for the automatic input source.
8.13 General

MENU \[\] → System → General → ENTER \[\]

The displayed image may differ depending on the model.

8.13.1 Max. Power Saving

Turns off the product to reduce power consumption after the PC has been left idle for a specified period of time.

Available only PC mode.

8.13.2 Game Mode

When connecting to a game console such as PlayStation™ or Xbox™, you can enjoy a more realistic gaming experience by selecting game mode.

- Precautions and limitations for game mode
  - To disconnect the game console and connect another external device, set Game Mode to Off in the setup menu.
  - If you display the TV menu in Game Mode, the screen shakes slightly.
- Game Mode is not available when the input source is set to TV or PC.
- After connecting the game console, set Game Mode to On. Unfortunately, you may notice reduced picture quality.
- If Game Mode is On
  - Picture mode is set to Standard and Sound mode is set to Movie.
8.13.3 BD Wise

Provides the optimal picture quality for Samsung DVD, Blu-ray and Home Theater products which support BD Wise. When BD Wise is turned On, the picture mode is automatically changed to the optimal resolution.

Available when you connect Samsung products that support BD Wise through an HDMI cable to the product.

8.13.4 Auto Power

Enabling this option will automatically power on the product if the power cable is connected.

8.13.5 Standby Control

You can set the screen standby mode to be applied when an input signal is received.

- Auto
  Power-saving mode will activate if no input signals are detected even though a source device is connected to the display.
  The message "No Signal" will appear if no source device is connected.

- On
  Power-saving mode will activate if no input signals are detected.

- Off
  The message "No Signal" will appear if no input signals are detected.

The Standby Control option is only enabled when Source is set to PC, DVI, HDMI or DisplayPort.
If "No Signal" is displayed although a source device is connected, check the cable connection. Refer to page 139 for details about connecting source devices.

8.13.6 Lamp Schedule

Enables the lamp value to be adjusted to a user-specified value at a specified time in MDC mode.

8.13.7 OSD Display

Displays or hides a menu item on the screen.

- Source OSD / No Signal OSD / MDC OSD
8.13.8 Power On Adjustment

You can set the warm-up time for the screen to turn on after the power button is pressed. (Range: 0 – 50 seconds)

⚠ A warm-up time that is too short may damage the product due to overvoltage.

8.13.9 Temperature Control

This function detects the internal temperature of the product. You can specify the temperature range that is acceptable.

The default temperature is set to 77°C.

The recommended operating temperature for this product is 75 to 80°C (based on an ambient temperature of 40°C).

⚠ The screen will become darker if the current temperature exceeds the specified temperature limit. If the temperature continues to rise, the product will power off to prevent overheating.

8.13.10 Device Name

Select or enter a Device Name. This name can be shown on network remote controls over the network.
8.13.11  3D Video Sync (ME75B model only)

Synchronize the displays with your 3D glasses when viewing a 3D video using multiple displays.

The displayed image may differ depending on the model.

**Current Mode:** Select the desired option from *Stand-Alone, Main,* and *Secondary.*

**Main Device Number:** If you set **Current Mode** to *Main,* the current display will be set as the primary display. Select a number between 1 and 10 for **Main Device Number.** The selected number will be assigned to the primary display.

**Select Main Device:** If **Current Mode** is set to *Secondary,* the number assigned to the primary display (set as *Main*) is displayed.

- If there is more than one display that is set as the primary display (*Main*), you can select one of these primary displays to connect to.
- If you change the **Main Device Number** on the primary display after the **Main Device Number** is configured on secondary (*Secondary*) displays, you must manually update the **Main Device Number** on each secondary (*Secondary*) display.
8.14 **Anynet+(HDMI-CEC)**

MENU \[\text{III}\] → System → Anynet+(HDMI-CEC) → ENTER \[\text{III}\]

### 8.14.1 **Anynet+(HDMI-CEC)**

**What is Anynet+?**

Anynet+ is a function that enables you to control all connected Samsung devices that support Anynet+ with your Samsung product remote. The Anynet+ system can be used only with Samsung devices that have the Anynet+ feature. To be sure your Samsung device has this feature, check if there is an Anynet+ logo on it.

- You can only control Anynet+ devices using the product remote control, not the buttons on the product.
- The product remote control may not work under certain conditions. If this occurs, reselect the Anynet+ device.
- The Anynet+ functions do not operate with other manufacturers’ products.
- For instructions explaining how to connect Anynet+ external devices, refer to the device’s user manual. You must connect an Anynet+ device using an HDMI cable. Some HDMI cables may not support Anynet+ functions.
- Anynet+ works when the AV device supporting Anynet+ is in the standby or on status.
- While in PIP mode, Anynet+ functions only when an AV device is connected as the primary display. It does not work if the AV device is connected as a secondary display.
- Anynet+ supports up to 12 AV devices in total. Note that you can connect up to 3 devices of the same type.
- However, you can connect only one Anynet+ Home Theater. To connect an Anynet+ Home Theater, connect the Home Theater to the product using an HDMI cable then.
Anynet+ Menu

The Anynet+ menu changes depending on the type and status of the Anynet+ devices connected to the product.

<table>
<thead>
<tr>
<th>Anynet+ Menu</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>View PC</td>
<td>Changes Anynet+ mode to PC mode.</td>
</tr>
<tr>
<td>Device List</td>
<td>Shows the Anynet+ device list.</td>
</tr>
<tr>
<td>(device_name) MENU</td>
<td>Shows the menu of the connected device menus. E.g. if a DVD player is connected, the disc menu of the DVD player will appear.</td>
</tr>
<tr>
<td>(device_name) Tools</td>
<td>Shows the tools menu of the connected device. E.g. if a DVD player is connected, the tools menu of the DVD player will appear. Depending on the device, this menu may not be available.</td>
</tr>
<tr>
<td>(device_name) Title Menu</td>
<td>Shows the title menu of the disc in the connected device. E.g. If a DVD player is connected, the title menu of the movie in the DVD player will appear. Depending on the device, this menu may not be available.</td>
</tr>
<tr>
<td>Receiver</td>
<td>Sound is played through the Receiver.</td>
</tr>
</tbody>
</table>

8.14.2 Auto Turn Off (No / Yes)

Setting an Anynet+ Device to turn Off automatically when the product is turned off.

- If Auto Turn Off is set to Yes, running external devices will turn off at the same time as the product powers off.
- May not be enabled depending on the device.

Switching between Anynet+ Devices

1. Press the TOOLS button, select Anynet+ (HDMI-CEC), and then press [ ].
2. Select Device List, and then press the [ ] button.
   - If you cannot find a device you want, select Refresh to refresh the list.
3. Select a device, and then press the [ ] button. You can switch to the selected device.
   - The Device List menu appears only when you set Anynet+ (HDMI-CEC) to On in the System menu.
   - Switching to the selected device may take up to 2 minutes. You cannot cancel the switching operation while switching is in progress.
If you have selected an Anynet+ device by pressing the SOURCE button and then selecting its input source, you cannot use the Anynet+ function. Make sure to switch to an Anynet+ device by using the Device List.

8.14.3 Receiver

You can listen to sound through a Receiver (i.e. Home Theater) instead of the product Speaker.

To listen to sound through a receiver, go to Receiver screen (System → Anynet+ (HDMI-CEC) → Receiver). Then select Receiver and set to On.

If your Receiver supports audio only, it may not appear in the device list.

Troubleshooting for Anynet+

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solution</th>
</tr>
</thead>
</table>
| Anynet+ does not work. | - Check if the device is an Anynet+ device. The Anynet+ system supports Anynet+ devices only.  
- You can connect only one receiver (home theater).  
- Check if the Anynet+ device power cord is properly connected.  
- Check the Anynet+ device’s Video/Audio/HDMI cable connections.  
- Check whether Anynet+ (HDMI-CEC) is set to On in the Anynet+ setup menu.  
- Check whether the remote control is Anynet+ compatible.  
- Anynet+ doesn’t work in certain situations. (Searching channels, operating Plug & Play (initial setup), etc.)  
- If you have removed and then reconnected the HDMI cable, please make sure to search devices again or turn your product off and on again.  
- Check if the Anynet+ function of the Anynet device is set on. |
| I want to start Anynet+. | - Check if the Anynet+ device is properly connected to the product and check if the Anynet+ (HDMI-CEC) is set to On in the Anynet+ Setup menu.  
- Press the TOOLS button to display the Anynet+ menu and select a menu you want. |
| I want to exit Anynet+. | - Select View PC in the Anynet+ menu.  
- Press the SOURCE button on the product remote control and select a non-Anynet+ device. |
### Problem | Possible Solution
--- | ---
The message “Connecting to Anynet+ device...” appears on the screen. | You cannot use the remote control when you are configuring Anynet+ or switching to a view mode. Use the remote control after the product has completed Anynet+ configuration or has finished switching to Anynet+.

The Anynet+ device does not play. | You cannot use the play function when Plug & Play (initial setup) is in progress.

The connected device is not displayed. | Check whether or not the device supports Anynet+ functions. Check whether or not the HDMI cable is properly connected. Check whether Anynet+ (HDMI-CEC) is set to On in the Anynet+ setup menu. Search Anynet+ devices again. Anynet+ requires an HDMI connection. Make sure the device is connected to your product with an HDMI cable. Some HDMI cables may not support Anynet+ functions. If the connection is terminated because there has been a power failure or the HDMI cable has been disconnected, please repeat the device scan.

---

**8.15 DivX® Video On Demand**

MENU [III] → System → DivX® Video On Demand → ENTER

Shows the registration code authorized for the product. If you connect to the DivX web site and register using that code, you can download the VOD registration file.

For more information about DivX® VOD, visit “http://vod.divx.com”.
8.16 Network Remote Control

Turn on/off or give permission to Samsung mobile phone devices to connect with and control the product.
You must have a Samsung Mobile phone/device which supports Wireless Remote Control. For more details, refer to each device’s manual.

8.17 Reset System

This option returns the current settings under system to the default factory settings.

8.18 Reset All

This option returns all the current settings for a display to the default factory settings.
9.1 Software Upgrade

The **Software Upgrade** menu lets you upgrade your TV’s software to the latest version.

### 9.1.1 By USB

Insert a USB drive containing the firmware upgrade file, downloaded from “www.samsung.com/sec,” into the TV. Please be careful not to disconnect the power or remove the USB drive until upgrades are complete. The TV will be turned off and on automatically after completing the firmware upgrade. When software is upgraded, video and audio settings you have made will return to their default settings. We advise you to write down your settings so that you can easily reset them after the upgrade.

### 9.1.2 Alternative Software

During the Software upgrading, When the Upgrade will discontinue from last step, this function be activated.

9.2 Contact Samsung

View this information when your TV does not work properly or when you want to upgrade the software. You can find information regarding our call centers and how to download products and software.
10.1 File Formats Compatible with MagicInfo Lite Player

[Read before using MagicInfo Lite Player]

- Supported USB-device file systems include FAT16 and FAT32. (NTFS is not supported.)
- A file with a vertical and horizontal resolution larger than the maximum resolution cannot be played.
  
  Check the vertical and horizontal resolution of the file.
- Video that does not contain audio data is not supported. Check that the video file contains audio data.
- Check the supported video and audio Codec types and Versions.
- Check the supported file versions.
  - Flash version up to 10.1 is supported
  - PowerPoint version up to 97 – 2007 is supported
- Content with a size of 2GB or larger cannot be assigned to a Network Schedule.

### Video

- Video content without audio is not supported.
- 3D video is not supported.
- Content with a resolution larger than the resolution specified in the table above is not supported.
- Video content with a Bit rate or Frame rate larger than the rate specified in the table above can cause choppy video during playback.
- H.264 Level 4.1 or lower is supported.
- H.264 FMO/ASO/RS, VC1 SP/MP/AP L4, AVCHD are not supported.
- MPEG4 SP/ASP
  - 1280 x 720 or smaller: Max. 60 frames / Larger than 1280 x 720: Max. 30 frames
- GMC 2 or higher is not supported.
Audio
- Audio content without video is not supported. (Only mp3 files are supported as background music for image/PPT slideshows. This feature is available only when using the network schedule menu.)
- Audio content with a Bit rate or Frame rate larger than the rate specified in the table above can cause choppy audio during playback.
- WMA 7, 8, 9 STD or lower is supported.
- WMA 9 PRO does not support lossless audio and multi-channel audio higher than 2 channels.
- WMA sampling rate 22050Hz mono is not supported.

Image
- Compatible image file format : Jpeg
- Supported maximum resolution : 15,360 x 8640
- Supported image effects : 8 effects (Fade1, Fade2, Blind, Spiral, Checker, Linear, Stairs, Wipe)

Flash
- Compatible with Flash 10.1
- Flash Animation
  - Compatible file format : SWF
- Resolution : 1280 x 720
  - Caution
    - Performance comparable to Flash Player on a Windows operating system cannot be guaranteed
    - Optimization is needed during content creation
- Flash Video
  - Compatible file format : FLV

    - Codec : H.264 BP
    - Resolution : 1920 x 1080
  - Audio
    - Codec : H.264 BP
  - Caution
    - F4V file format is not supported
    - Screen Video is not supported
Power Point

- Compatible document file formats
  - Extension: ppt, pptx
  - Version: Office 97 ~ Office 2007

- Functions not supported
  - Animation effect
  - 3D shapes (which will be displayed in 2D)
  - Header and footer (some subitems are not supported)
  - Word Art
  - Align (A group alignment error may occur)
  - Office 2007 (SmartArt is not fully supported. 97 out of 115 subitems are supported.)
  - Object insertion
  - Opening encrypted documents
  - Vertical text (some subitems are not supported)
  - Slide notes and handout
10.2 Network Schedule

10.2.1 Connecting to a server

Network setup

To run MagicInfo Lite, connect to a network.

Refer to 141 page for details about the Network Settings menu.

Server setup

Go to MENU → Network → MagicInfo Lite Settings → Server. Next, enter the server information. (E.g.: http://192.168.0.10:7001/MagicInfo/)

<table>
<thead>
<tr>
<th>MagicInfo Lite</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Server</strong></td>
</tr>
<tr>
<td>Server Address</td>
</tr>
<tr>
<td>Port</td>
</tr>
</tbody>
</table>

Configuring the FTP mode and default storage space

- **Default Storage**: Specify the location you want to save content (downloaded from the server) to.
  - **Internal Memory**: Save the content to the internal memory of the product.
  - **USB**: Save the content to USB memory.

  If a network schedule is running when USB memory is not connected, the default content will run.
10.2.2 MagicInfo Lite Settings

Press the MagicInfo Lite button on the remote control.

You can view whether the server is connected (approval) in the MagicInfo Lite menu screen. To view whether the server is connected when a network schedule is running, press INFO on the remote.

![MagicInfo Lite menu screen]

10.2.3 Approving a connected device from the server

1. Access the server you have assigned to your device.

2. Enter your ID and password to log in.
3 Select **Device** from the top menu bar.

4 Select **Lite Device** from the menus on the left.

5 Select **View Unapproved Lite Device** from the sub-menus of **Lite Device**.

6 Select the **Approve** button for your device from the list of unapproved Lite devices.

Pressing the **INFO** button on the remote when a network schedule is running will display the details of the schedule. Check that the correct device has been selected by viewing the device ID in the details.
7 Enter the information required to approve the device.

- **Device Name**: Enter the device name.
- **Device Model Name**: Select your device model.
- **Device Group**: Select to specify the group.
- **Location**: Enter the current location of the device.

8 Select the **View All Lite Device** menu to check that the device has been registered.

9 When the device is approved by the server, the schedule registered in the selected group will be downloaded to the device. The schedule will run after it is downloaded.

- For further details on how to configure a schedule, refer to the <MagicInfo server user’s manual>.
- If a device is deleted from the list of devices approved by the server, the device will reboot to reset its settings.
10.2.4 Setting the current time

A schedule may not run if the time set on the device is different from the server’s current time.

1. Go to the tabs **Device → Time**.

2. Select your device.

3. Select **Clock Set**, and sync the time with the server.

For further details on how to manage the time (scheduling, holiday management, etc.), refer to the <MagicInfo server user’s manual>. 
10.3  Local Schedule

Run a schedule created by **Local Schedule Manager**.

Go to **Local Schedule Manager** → Select the content you want to run.

![Diagram](image)

This menu is disabled if no schedule was created by **Local Schedule Manager**.

1. Select **Local Schedule Manager** in the **MagicInfo Lite** menu screen.
2. Run a schedule created by local schedule.

10.4  Local Schedule Manager

Configure the settings for playback from **Local Schedule**. Alternatively, select and play content from internal or USB memory according to the customized playback sequence.

10.4.1  Registering a Local Schedule

1. Select **Local Schedule Manager** in the **MagicInfo Lite** menu screen.
2 Select **Create** in the **Local Schedule Manager** screen.

3 Select **Time** to set the time you want to play content.

4 Select **Contents** to specify the content you want to play.

5 Select **Save**.
Select the memory space you want to save the content to.

Check that the schedule has been added to the Local Schedule Manager.
10.4.2 Modifying a Local Schedule

Ensure at least one Local Schedule is registered.

1 Select Local Schedule Manager in the MagicInfo Lite menu screen.

2 Select the local schedule you want to modify.
3 Select **Edit**.

4 Change the details of the local schedule. Next, select **Save**.

### 10.4.3 Deleting a Local Schedule

Ensure at least one **Local Schedule** is registered.

1 Select **Local Schedule Manager** in the **MagicInfo Lite** menu screen.
2. Select the local schedule you want to delete.

3. Select **Delete**.

![Local Schedule Manager](image)
10.4.4 Running a Local Schedule

Ensure at least one Local Schedule is registered.

1 Select Local Schedule Manager in the MagicInfo Lite menu screen.

2 Select the local schedule you want to run. Next, select Run.
10.4.5 Stopping a Local Schedule

This function is enabled only when a schedule is running. Selecting Stop will change the running mode from local schedule to network schedule.

1. Select Local Schedule Manager in the MagicInfo Lite menu screen.

2. Select Stop.
10.4.6 Viewing the details of a Local Schedule

1. Select **Local Schedule Manager** in the **MagicInfo Lite** menu screen.

2. Select the local schedule you want to view the details of.

3. The details of the schedule will be displayed.
10.5 Contents Manager

10.5.1 Copying content

1 Select Contents Manager in the MagicInfo Lite menu screen.

2 Select the content you want to copy.
   - If content under Internal Memory is selected: You can copy the content under Internal Memory to USB memory.
   - If content under USB is selected: You can copy the content under USB memory to Internal Memory.

   Selecting content under Internal Memory and USB memory at the same time will disable copying.

3 Select Copy.
10.5.2 Deleting content

1. Select Contents Manager in the MagicInfo Lite menu screen.

2. Select the content you want to delete.
   - Content under Internal Memory and USB memory can be deleted at the same time.

3. Select Delete.
10.6 Internal AutoPlay

10.6.1 Running Internal AutoPlay

Ensure at least one content item exists under Internal Memory.

1. Select Internal AutoPlay in the MagicInfo Lite menu screen.
   - Play content, which has been copied to Internal Memory, in alphabetical order.

10.7 USB AutoPlay

10.7.1 Running Internal AutoPlay

Ensure a USB device is inserted. Be sure to create a folder named “MagicInfoSlide” in the USB device and put content in the folder.

1. Select USB AutoPlay in the MagicInfo Lite menu screen.
   - The content contained in the MagicInfoSlide folder on the USB device will play in alphabetical order.
10 MagicInfo Lite

- **USB AutoPlay** will automatically run if USB memory is connected when **Network Schedule** or **Local Schedule** is running.

![MagicInfo Lite interface]

**10.8 When Content is Running**

**10.8.1 Viewing the details of the content that is running**

Press the **INFO** button on the remote control.

1. **Software Version**: Displays the software version of a device
2. **Device Name**: Displays the name of a device recognized by the server
3. **Device ID**: Displays the original identification number of a device
4. **Mode**: Displays the current operating mode (**Network Schedule**, **Local Schedule**, **Internal AutoPlay** or **USB AutoPlay**) of MagicInfo Lite Player
5. **Server**: Displays the connection status (**Connected**, **Disconnected** or **Non-approval**) of the server
6. **USB**: Displays the connection status of a USB device
7 **Schedule Download**: Displays the progress of a network schedule being downloaded from the server.

### Information

- **Software Version**: A-VNUSCDSP-100
- **Device Name**: Monitor
- **Device ID**: FE-FF-FF-FF
- **Mode**: Network Schedule
- **Server**: Connected
- **USB**: Connected
- **Schedule Download**: No Schedule to download

10.8.2 **Changing the settings for the content that is running**

Press the **TOOLS** button on the remote control.

You can change the **Picture Mode** or **Sound Mode** setting or safely remove a USB device (**Safely Remove USB**) while content is playing by pressing the **TOOLS** button on the remote control.

- **Picture Mode**: Customizes the screen settings for the content currently playing (**Dynamic**, **Standard**, **Natural**, **Movie**)
- **Sound Mode**: Customizes the audio settings for the content currently playing (**Standard**, **Music**, **Movie**, **Clear Voice**, **Amplify**)
- **Safely Remove USB**
11.1 Requirements Before Contacting Samsung Customer Service Center

11.1.1 Testing the Product

Before calling Samsung Customer Service Center, test your product as follows. If the problem persists, contact Samsung Customer Service Center.

Check if your product is operating normally by using the product test function.

If the screen remains blank while the power LED blinks even when the product is correctly connected to a PC, perform product testing.

1. Power off both the PC and product.
2. Disconnect all the cables from the product.
3. Power on the product.
4. If “No Signal” is displayed, the product is operating normally.

If the screen remains blank, check the PC system, video controller and cable.

11.1.2 Checking the Resolution and Frequency

“Not Optimum Mode” will briefly be displayed if a mode that exceeds a supported resolution is selected (refer to Supported Resolutions).
### 11.1.3 Check the followings.

#### Installation issue (PC mode)

<table>
<thead>
<tr>
<th>Issue</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The screen keeps switching on and off.</td>
<td>Check the cable connection between the product and PC, and ensure the connection is secure. (<em>2.2 Connecting and Using a PC</em>)</td>
</tr>
<tr>
<td>Blank spaces are found at the top and bottom of the screen when an HDMI or HDMI-DVI cable is connected to the product and PC.</td>
<td>Blank spaces on the screen are not caused by the product. The cause of the problem is the PC or graphics card, and can be fixed by adjusting the screen size in the HDMI or DVI option of the graphics card settings menu. If the graphics card settings menu has no option to adjust the screen size, update the graphics card driver to the latest version. (Please contact the graphics card or computer manufacturer for details on how to adjust the screen settings.)</td>
</tr>
</tbody>
</table>

#### Screen issue

<table>
<thead>
<tr>
<th>Issue</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The power LED is off. The screen will not switch on.</td>
<td>Make sure that the power cord is connected. (<em>2.2 Connecting and Using a PC</em>)</td>
</tr>
<tr>
<td>&quot;No Signal&quot; is displayed on the screen (refer to &quot;Connecting to a PC&quot;).</td>
<td>Check that the product is connected correctly with a cable (<em>2.2 Connecting and Using a PC</em>)</td>
</tr>
<tr>
<td>&quot;Not Optimum Mode&quot; is displayed.</td>
<td>This message is displayed when a signal from the graphics card exceeds the product’s maximum resolution and frequency. Refer to the Standard Signal Mode Table and set the maximum resolution and frequency according to the product specifications.</td>
</tr>
<tr>
<td>The images on the screen look distorted.</td>
<td>Check the cable connection to the product (<em>2.2 Connecting and Using a PC</em>)</td>
</tr>
</tbody>
</table>
## Screen issue

<table>
<thead>

</tbody>
</table>
## 11.2 Q & A

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>How can I change the frequency?</td>
<td>Set the frequency on your graphics card.</td>
</tr>
<tr>
<td></td>
<td>- &quot;Windows XP&quot;: Go to Control Panel → Appearance and Themes → Display → Settings → Advanced → Monitor and adjust the frequency in Monitor Settings.</td>
</tr>
<tr>
<td></td>
<td>- &quot;Windows ME/2000&quot;: Go to Control Panel → Display → Settings → Advanced → Monitor and adjust the frequency in Monitor Settings.</td>
</tr>
<tr>
<td></td>
<td>- &quot;Windows Vista&quot;: Go to Control Panel → Appearance and Personalization → Personalize → Display Settings → Advanced Settings → Monitor and adjust the frequency in Monitor Settings.</td>
</tr>
<tr>
<td></td>
<td>- &quot;Windows 7&quot;: Go to Control Panel → Appearance and Personalization → Display → Adjust resolution → Advanced Settings → Monitor and adjust the frequency in Monitor Settings.</td>
</tr>
</tbody>
</table>
### Troubleshooting Guide

#### Question: How can I change the resolution?

- "Windows XP": Go to **Control Panel → Appearance and Themes → Display → Settings** and adjust the resolution.
- "Windows ME/2000": Go to **Control Panel → Display → Settings** and adjust the resolution.
- "Windows Vista": Go to **Control Panel → Appearance and Personalization → Personalize → Display Settings** and adjust the resolution.
- "Windows 7": Go to **Control Panel → Appearance and Personalization → Display → Adjust Resolution** and adjust the resolution.

#### Question: How do I set power-saving mode?

- Windows XP: Set power-saving mode in **Control Panel → Appearance and Themes → Display → Screen Saver Settings** or BIOS SETUP on the PC.
- Windows ME/2000: Set power-saving mode in **Control Panel → Display → Screen Saver Settings** or BIOS SETUP on the PC.
- Windows Vista: Set power-saving mode in **Control Panel → Appearance and Personalization → Personalize → Screen Saver Settings** or BIOS SETUP on the PC.
- Windows 7: Set power-saving mode in **Control Panel → Appearance and Personalization → Personalize → Screen Saver Settings** or BIOS SETUP on the PC.

Refer to the user manual for your PC or graphics card for further instructions on adjustment.

Plug-and-Play: This monitor can be installed and used with any Plug-and-Play compatible systems. Two-way data exchange between the monitor and PC system optimizes the monitor settings. Monitor installation takes place automatically. However, you can customize the installation settings if desired.

Due to the nature of the manufacturing of this product, approximately 1 pixel per million (1ppm) may appear brighter or darker on the panel. This does not affect product performance.
This device is a Class A digital apparatus.

### 12.2 PowerSaver

The power-saving function of this product reduces power consumption by switching off the screen and changing the color of the power LED if the product is not used for a specified period of time. The power is not turned off in power-saving mode. To switch the screen back on, press any key on the keyboard or move the mouse. Power-savign mode only functions when the product is connected to a PC with a power-saving function.

<table>

</tbody>
</table>

- The displayed power consumption level can vary in different operating conditions or when settings are changed.
- SOG (Sync On Green) is not supported.
- To reduce the power consumption to 0, turn off disconnect the power cord. Disconnect the power cable if you will not be using the product for an extended period of time (during vacation, etc.).
- Test condition of typical power consumption: Energy star program requirement for Television Version 5.3
12.3 Preset Timing Modes

- This product can be set to only one resolution for each screen size to obtain the optimum picture quality due to the nature of the panel. Using a resolution other than the specified resolution may degrade the picture quality. To avoid this, it is recommended that you select the optimum resolution specified for your monitor.

- Check the frequency when you exchange a CDT monitor (connected to a PC) for an LCD monitor. If the LCD monitor does not support 85Hz, change the vertical frequency to 60Hz using the CDT monitor before you exchange it with the LCD monitor.

The screen will automatically be adjusted if a signal that belongs to the following standard signal modes is transmitted from your PC. If the signal transmitted from the PC does not belong to the standard signal modes, the screen may be blank with the power LED on. In such a case, change the settings according to the following table by referring to the graphics card user manual.

<table>
<thead>
<tr>
<th>Display Mode</th>

</tbody>
</table>
Horizontal Frequency

The time required to scan a single line from the left to the right side of the screen is called a horizontal cycle. The reciprocal number of a horizontal cycle is called horizontal frequency. Horizontal frequency is measured in kHz.

Vertical Frequency

The product displays a single image multiple times per second (like a fluorescent light) to display what the viewer sees. The rate of a single image being displayed repeatedly per second is called vertical frequency or refresh rate. Vertical frequency is measured in Hz.

<table>
<thead>

Contact SAMSUNG WORLD WIDE

If you have any questions or comments relating to Samsung products, please contact the SAMSUNG customer care center.

Customer Care Center 1588-3366

Web : www.samsungsvc.co.kr
Responsibility for the Pay Service (Cost to Customers)

When the service is requested, in spite of in warranty, we may charge you for a visit from a service technician in the following cases.

Not a product defect

Cleaning of the product, Adjustment, Explanation, Re-installation and etc.

- If a service technician gives instructions on how to use product or simply adjusts options without disassembling product.
- If a defect is caused by external environmental factors (Internet, Antenna, Wired Signal, etc.).
- If a product is reinstalled or devices are connected additionally after installing the purchased product for the first time.
- If a product is reinstalled to move to a different spot or to move to a different house.
- If customer requests instructions on how to use because of another company’s product.
- If customer requests instructions on how to use the network or another company’s program.
- If customer requests software installation and setup for the product.
- If a service technician removes/cleans dusts or foreign materials inside of the product.
- If customer requests an installation additionally after purchasing a product through home-shopping or online.

A Product damage caused by customer’s fault

Product damage caused by customer’s mishandling or wrong repair.

If a product damage is caused by;

- external impact or drop.
- use of supplies or separately sold product unspecified by Samsung.
- repair from a person besides an engineer of outsourcing service company or partner of Samsung Electronics Co., Ltd.
- remodeling or repairing the product by customer.
- using it with incorrect voltage or non-authorised electrical connections.
- not following the "cautions" in User Manual.

Others

- If product fails by natural disaster (lightning, fire, earthquake, flood damage, etc).
- If consumable components are all used up (Battery, Toner, Fluorescent lights, Head, Vibrator, Lamp, Filter, Ribbon, etc.).

If customer requests a service in case the product has no defect, service fee may be charged. So please read User Manual first.
Optimum Picture Quality and Afterimage Burn-in Prevention

Optimum Picture Quality

To enjoy the optimum picture quality, go to Control Panel on your PC and adjust the resolution and refresh rate as follows. The picture quality of TFT-LEDs may degrade if the optimum resolution is not selected.

- Resolution: 1920 X 1080
- Vertical frequency (refresh rate): 56 ~ 75 Hz

Due to the nature of the manufacturing of this product, approximately 1 pixel per million (1ppm) may be brighter or darker on the LED panel. This does not affect product performance.

- The number of sub-pixels by LED panel type: ME65B, ME75B: 6,220,800

Run "Auto Adjustment" to improve the picture quality. If noise is still found even after auto adjustment, adjust Coarse or Fine.

Leaving the screen fixed on a stationary image for an extended period of time may cause afterimage burn-in or defective pixels.

- Activate power-saving mode or a dynamic screen saver if you will not be using the product for an extended period of time.

Unlike CDT monitors, TFT-LED monitors (due to the nature of the panel) can be set to only one resolution to obtain the optimum picture quality. Therefore, setting a resolution other than the specified resolution may degrade the picture quality. To avoid this, it is recommended that you select the optimum resolution specified for your monitor.
Prevention of Afterimage Burn-in

What is afterimage burn-in?

Afterimage burn-in should not occur when the LCD panel is operating normally. Normal operation refers to a continuously changing video pattern. If the LCD panel displays a fixed pattern for an extended period of time (more than 12 hours), a slight voltage difference may occur between the electrodes in pixels that control the liquid crystals.

Such a voltage difference between electrodes increases with time and makes the liquid crystals thinner. When this occurs, a previous image can remain on the screen when the pattern changes. To prevent this, the accumulated voltage difference should be reduced.
Appendix

- Powering Off, Screen Saver and Power Saving Mode
  - Power off the product for 2 hours after using it for 12 hours.
  - Go to Display Properties > Power Supply on your PC and set the product to power off as required.
  - Using a screen saver is recommended.
    It is best to use a single-color or moving-image screen saver.

- Regular Color Change

  ![Regular Color Change Diagram]

  Use 2 colors
  Switch between 2 colors every 30 minutes as shown above.

- Avoid combinations of a text color and background color of contrasting brightness.
  Avoid using grey as it may contribute to afterimage burn-in.
  Avoid using colors of contrasting brightness (black and white; grey).

  ![Avoiding Color Combinations Diagram]

- Regular Text Color Change
  - Use bright colors of similar brightness.
    Interval: Change text color and background color every 30 minutes

  ![Regular Text Color Change Diagram]

  - Move and change text every 30 minutes as shown below.

  ![Moving Text Diagram]

  - Regularly display a moving image along with a logo.
    Interval: Display a moving image along with a logo for 60 seconds after using for 4 hours.

  - The best way to protect the product from afterimage burn-in is switching the power off or setting the PC or system to run a screen saver when not in use. Also, Warranty service may be limited depending on instruction guide.
Terminology

Dot Pitch

The product and screen consist of red, green and blue dots. A shorter distance between the dots produces a higher resolution. Dot pitch refers to the distance between the shortest distance between dots of the same color. Dot pitch is measured in millimeters.

Vertical Frequency

The product displays a single image many times per second (like a fluorescent light that flickers) to display an image for a viewer to see. The rate of a single image being displayed repeatedly per second is called vertical frequency or refresh rate. Vertical frequency is measured in Hz.

E.g. 60Hz refers to a single image being displayed 60 times in one second.

Horizontal Frequency

The time required to scan a single line from the left to the right side of the screen is called a horizontal cycle. The reciprocal number of a horizontal cycle is called horizontal frequency. Horizontal frequency is measured in kHz.

Non-interlace Mode and Interlace Mode

Non-interlace mode (progressive scan) displays a horizontal line from the top to the bottom of a screen progressively. Interlace mode displays the odd number lines first and the even number lines next. Non-interlace mode is mainly used in monitors as it produces screen clarity and interlace mode is mainly used in TVs.

Plug & Play

Plug & Play is a function that allows the automatic exchange of information between a monitor and PC to produce an optimum display environment. The product uses VESA DDC (international standard) to execute Plug & Play.

Resolution

Resolution is the number of horizontal dots (pixels) and vertical dots (pixels) that form a screen. It represents the level of display detail. A higher resolution enables more data to be displayed on the screen and is useful to perform multiple tasks simultaneously.

E.g. A resolution of 1920 X 1080 consists of 1,920 horizontal pixels (horizontal resolution) and 1,080 vertical pixels (vertical resolution).
Multiple Display Control (MDC)

MDC (Multiple Display Control) is an application that allows multiple display devices to be controlled simultaneously using a PC. Communication between a PC and monitor takes place using RS232C (serial data transmission) and RJ45 (LAN) cables.

DVD (Digital Versatile Disc)

DVD refers to a CD-sized mass storage disk where you can save multimedia (audio, video or game) applications using MPEG-2 video compression technology.

HDMI (High Definition Multimedia Interface)

It is an interface that can be connected to a digital audio source as well as a high-definition video source by using a single cable without compression.

Component ports (green, blue and red)

The component ports, which identify, transmit and receive contrast signals, provide superior picture quality to any other video connection methods.

Stereo

Stereo refers to a technology that outputs audio signals via two channels. It delivers 3D sound experience through separate left and right audio channels over two speakers.

Source

Input source refers to a video source device connected to the product such as a camcorder or video or DVD player.

480i / 480p / 720p / 1080i / 1080p

Each of the scanning rates above refers to the number of effective scanning lines that decides the screen resolution. The scanning rate may be indicated in i (interlaced) or p (progressive), depending on the scanning method.

- Scanning

Scanning refers to a process of sending pixels that form an image progressively. A larger number of pixels will deliver a clearer and more vivid picture.

- Progressive

In progressive scan mode, all lines of pixels are scanned one by one (progressively) on the screen.

- Interlaced

In interlaced scan mode, every other line of pixels is scanned from top to bottom first and then the remaining lines of pixels (that were not scanned) are scanned.
